REVIEW OF OPERATION

The year under review witnessed marked improvement in the modest business and turnover. The gross turnover was higher by 21% at Rs. 21973.43 lacs (Rs. 18113.50 lacs). The Board considers the overall performance gratifying in the light of very keen competition faced by both the Divisions, both in domestic and international markets.

ANNUAL REPORT 1998-99

DIVIDENDS

Your Directors are pleased to recommend for the year ended 31st March 1999, for your approval and subject to approval of the Financial Institutions and Bank, a Dividend of Rs.1.50 (previous year Rs. 1.50) per Equity Share of Rs. 10/- each on 1,45,61,664 Equity Shares.

The Directors have declared interim dividend @ 12.5% (proportionate) on 10,00,000 Redeemable Cumulative Non-Convertible Preference Shares of Rs. 100/- each. As no final dividend has been recommended on these preference shares, the interim dividend paid, shall be fully adjusted against as final dividend for the financial year ended 31st March, 1999.

TEXTILE DIVISION

The Textile sales were marginally higher as demand for export and domestic markets were sluggish during most part of the year. The high value yarn dyed cotton fabrics and Corduroy supported the Company to retain its position. Competition in the world market from the South East Asian countries was intent due to flooding of market at very low prices. The overall domestic demand was also low due to general recession of demand in the Country.

The price of various inputs, including cotton, has increased considerably. The prices of all inputs including Colour, Chemicals, Dyes, Furnace Oil etc. have also gone up considerably during the year. However, the Company tried to set off the effect of high input cost through improvement in product mix.

During the year under review, the Company has imported Picanol Rapier Gamma Looms and other balancing equipment for the manufacture of Yarn Dyeing and Piece Dyeing Corduroy Fabrics. The Company is expecting the overall effect of expansion-cum-modernisation programmes in the current year. The future growth in the business is expected after installation of imported machinery and fuller utilisation of the capacity. The Company will have well diversified product portfolio to mitigate any cyclical down turn in any product/market.

PLASTICS DIVISION

During the year under review, Plastics Division showed a modest growth in its turnover and has maintained its undisputed leadership in the market, in spite of

very difficult business conditions. Products meant for building sector such as Water Tanks, Plastic Doors, Plastic Sections etc. have all done well. Industrial products have picked up because of changes in product mix and strategy. However, products meant for the electrical sector such as SMC Boxes, Pultruded articles etc. have had a sluggish year because of the poor financial position of various Electricity Boards.

Last year this Division introduced a second brand of water tank, namely, "RENO". The Company introduced this brand selectively in some markets and it is finding good acceptance from people who are price conscious. We believe that with further spread of RENO Tanks in other markets, we would be able to continue our growth in water tanks' segment.

During the year this Division introduced PRELAM plastic sections with excellent finishes. These have been very well received and this Division has been able to gain access to newer markets for doors, partitions and furniture articles with the help of these sections. This Division is also planning to introduce several new finishes, which will enhance the appeal of PRELAM sections in a big way.

This Division also modified Insulated Boxes and is trying to push them both in institutional and retail markets. This Division achieved reasonable success in the big buyer segment and retail market. Some of the Government Departments such as Fisheries has started buying and distributing them to Fishermen for better preservation of fish.

EXPANSION PROJECT

The Plastics Division has successfully completed the trial run of its Extrusion Plants. Right quality material has been produced and sold. The Plastics Division also created additional capacity in Rotational Moulding. The new range of pallets as made by Plastics Division are now under trial and the Company expect the business to build up in coming years. The pallets produced by the conventional process introduced by this Division are receiving better acceptance, especially for custom applications.

The Company is in the process of upgrading its process house in its Textile Division to have continuous process from batch process at present by installing new imported processing machinery. With a

SINTEX INDUSTRIES LIMITED

new process house, the Company will be able to produce various kinds of finishes which will also give us an edge over the competitors and help us in adding value on our products and have a better realisation. This would enable the Company to optimise the benefits of its continuous technological upgradation efforts in the past and manufacture high value fabrics conforming to most stringent international quality standards, thereby giving a big boost to its growing exports to hard currency markets. This would lead to all round gains in the operations by improved sales realisation, lower value loss, high consistency of quality and international standards of finishing for the fabrics. It would also enable the Company to enter into new product segments in fast growing bottom varieties like Khakis, Chino, Drills, Gabardines etc. and give a wider domestic and international customer base.

The Company has applied for a loan of Rs. 35.00 crores from Financial Institution for setting up a Fabric Process House and your Company is also eligible for 5% interest subsidy which has been provided for under the Technology Upgradation Fund Scheme (TUFS) presented in the Union Budget of 1999-2000.

With the implementation of business process re-engineering which is under way, the business strategy and product upgradation, it is hoped that the turnover and profit will increase in future and this Division will cater mainly to the export market either directly or through merchant exporters. The state-of-the-art technology adopted will result in repeated orders from European clients.

The Company expects to improve its performance during the current year by its products, market diversification and concentration on high value added products.

In order to meet the entire requirement of uninterrupted and quality power, the Company has acquired 2 Nos. 3.8 MW Captive Power Plants. Out of these two, one plant was already commissioned in March, 1998 and the other will be commissioned shortly. Thereby the Company would achieve 100% self-sufficiency in power. Each of these co-generation plants is configured to deliver power and steam from single fuel source and all electricity and steam generated by it will be consumed captively.

ANNEXURE TO THE AUDITORS' REPORT

(Referred to in paragraph 1 of our report of even date on the accounts for the year ended 31st March, 1999 of Sintex Industries Limited)

1. The Company has maintained proper records showing full particulars including quantitative details and situations of its fixed assets other than records for fixed assets purchased prior to the year 1960. The fixed assets have been physically verified by the management during the year. We are informed that no material discrepancies were noticed on such verification.
2. None of the fixed assets has been revalued during the year.
3. The stocks of finished goods, stores, spare parts and raw materials have been physically verified during the year by the management. In our opinion, the frequency of verification is reasonable.
4. The procedures of physical verification of stocks followed by the management are reasonable and adequate in relation to the size of the Company and the nature of its business.
5. The discrepancies noticed on verification between the physical stocks and the book records were not material.
6. On the basis of our examination of stock records, we are of the opinion that the valuation of stocks is fair and proper in accordance with the normally accepted accounting principles, and is on the same basis as in the preceding year.
7. In our opinion, the rate of interest and other terms and conditions on which loans have been taken from Companies listed in the registers maintained under Section 301 are not, prima facie, prejudicial to the interest of the Company. As informed to us, there is no Company under the same management within the meaning of Section 370(1B) of the Companies Act, 1956.
