2. Management Discussion and Analysis

Financial Review

Your Company recorded a total income of Rs.162.85 lacs during the year under review compared to previous year's figure of Rs. 53.69 lacs. The Company has posted a net profit of Rs. 18.70 lacs as against the loss of Rs. 17.45 lacs in the previous year. The marketing of earthing products and execution of contracts for earthing and lightning protection systems have made a significant contribution in the total revenue of the Company. The Company has made good progress in this segment and incoming years will witness better results.

The revenue from amusement parks continued to get the hit due to extreme weather conditions. The slow down of Indian economy particularly in Uttar Pradesh where Company's amusement parks are located, coupled with negativity in perception about future due to recessionary trends, also perhaps, added to reduction in foot falls in amusement parks. The Company is working on some stimulus packages to increase the revenue though the perception of common man and available disposable income in its hands shall remain the key factor.

Industry Structure and Development

During the year under review, the general slow down in Indian economy coupled with global recessionary trend had its impact on amusement industry at large. In spite of the growing interest of masses towards Malls, multiplexes and amusement parks with latest gadgetry in rides, the subdued spending outlay of common man on amusement indicates cautionary attitude for this activity. In spite of such odds the outlook for the sector is encouraging with investments being made in the form of theme parks, water parks, family entertainment centers, multiplexes, interactive arcades, food bazaar and sports zones. Your Company intends to make out the best out of opportunities available vis-à-vis the means at its disposal and the available options are being examined.

Outlook, risks and concerns

Due to rise in per capita income, the spending on amusement in India has risen significantly as compared to last decade. To retain the attraction of amusement park and increase the footfalls, both disposable income per person and constant innovation whether by inducting new rides or promotional programs etc. are equally important. The increased cost due to need for continuous innovation, maintenance expenditure and the stiff competition from other sources of entertainment have put profit margins of the industry under pressure. Further, imposition of 30% entertainment tax on amusement parks by the government of Uttar Pradesh in February 2009 will add to the pressure on operating margins because the consequent increase in entry fee is not commercially viable. Your Company already operates on thin margins as it needs to constantly upgrade itself by introduction of new features and rides. But the high cost of rides and low revenue inflow from parks pose additional challenge in this regard. Further, due to relatively low per capita income in the regions where your company operate amusement parks, entry costs have to be kept low to keep the parks within the reach of masses that has further stressed the cash flows. Your Company is monitoring the situation closely and is exploring other viable sources of entertainment. The electrical engineering segment viz. Earthing and lightning protection systems business has responded well as the Company has executed orders to the customers' satisfaction including for some government departments. The power plants, electronics and other hi-tech centers where earthing is significantly important are target customers of Company apart from high rise buildings, hotels and residential units. The management is going full thrust to explore all possible areas in order to establish strong foothold in this arena.

Opportunities and threats

Your Company foresees good potential in the amusement sector with further encouragement from the government by providing the right support and enabling facilities. It is perceived that by providing substantial entertainment tax relief and acknowledgement of amusement industry as a vital part of social infrastructure would go a long way in enhancing revenues. The Company is exposed to normal industry risks attributable to respective segments. In order to meet the challenge of sustaining itself in spite of thinning of margins in amusement segment, the strategy is to focus on increasing the volume of visitors, exploring avenues for diversification and accordingly measures are being developed/implemented. In electrical engineering segment, the Company uses the latest technology for earthing and lightning protection installations which are proven to give better results as compared to traditional techniques. However, due to relatively higher cost and lack of awareness about said technology in target clients, there is tough competition. To meet the challenge, the Company aims not only to educate or spread awareness about its product but also secure credentials from its clients about its performance.

Adequacy of Internal Control Systems

The Company has in place a proper and adequate system of internal control to monitor proper recording of transactions authorized according to policies and procedures laid down by the Company. The Company ensures that all regulatory guidelines are being complied with at all levels.

The Audit Committee reviews the internal control mechanisms periodically.

Segment wise Performance

The Company's recent venture of dealing in earthing materials and lightning protection systems

in the electrical engineering segment has been categorised under the head "Trading" for the purpose of segment reporting in the Annual Accounts for the year under review. Similarly, other income has been categorised under the head "Others". Segment wise, the Amusement Parks generated a revenue of Rs. 41.97 Lacs and the Trading segment's revenue amounted to Rs. 32.03 lacs during the year under review. The other income accounted for Rs. 88.85 lacs. The segment of Amusement Parks incurred a loss of Rs. 93.02 lacs. However, the profit from Trading segment of Rs. 9.00 lacs coupled with other segment's profit of Rs. 88.85 lacs culminated into net profit of Rs. 4.83 lacs. Keeping in view the encouraging results from Trading segment, in the current year, your Board is hopeful of better performance.

Human Resources

The relationship with employees continued to be cordial during the year. The Directors place on record their sincere appreciation to the employees at all levels. In terms of the provisions of Section 217 (2A) of the Companies Act, 1956, read with the Companies (Particulars of Employees) Rules, 1975, as amended, there was no employee during the year drawing remuneration more than the stipulated amount in the said rules. The Company has a team of able and experienced industry professionals. The number of employees on the Company's rolls stood at 41.

Cautionary Statement

Statement in the "Management Discussion and Analysis" describing the Company's projections, estimates, expectations or predictions may be 'forward looking statements' within the meaning of applicable security laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that would make a difference to the Company's operations include changes in government regulations, tax regimes, economic developments within the country and abroad and such other factors.
