8th Annual Report 1999-2000

DIRECTORS' REPORT

To

The Members,

	(Rs. in lakhs)

Balance B/f from previous year	635.14	631.18
Leaving a balance to be carried forward	642.80	635.14

Despite significant improvement in production and sale volumes, there is not much of improvement in the bottom line mainly due to slump in Pig Iron and Cement markets resulting in poor unit sales realisations during most part of the year. This apart, increase in financial costs and some of the input costs also contributed to the declining profitability.

OPERATIONS :

94,377 MTs of Pig Iron was produced during the year - the highest since commencement of Commercial Production in 1994 - as against 90,111 MTs in the previous year. In terms of Capacity Utilisation, this amounts to 104.86% of the rated capacity of the plant. During this year, Company despatched 94,243 MTs

leaving a balance of 1,248 MTs. In terms of value, Pig Iron sales amount to Rs. 6,730.33 lacs.

82,450 MTs of Cement was produced during the year - the highest production since commencement of Commercial Production in 1996 - as against 60,395 MTs in the previous year. In terms of Capacity Utilisation this amounts to 91.61% of the rated capacity of the plant. During the year, Company despatched 81,831 MTs leaving a balance of 1,347 MTs. In terms of value, Cement sales amount to Rs. 1,683.82 lacs. During the year, Company had achieved a turnover of Rs. 1,135.79 lacs in Construction Division.

Profit for the year is low mainly due to the increase in production cost, increased interest burden and lesser unit realisation on the Company's Products etc.

MARKET

In the current adverse market conditions demand continues to remain subdued. While sales realisation for Pig Iron has come down as compared to last year, not much of improvement could be seen with respect to Cement. However, there is a silver lining by way of increase in the sales volume of both Pig Iron and Cement by 4.74% & 12.57% respectively. In a highly competitive market, where profitability is under severe pressure, only increased turn over can result in better bottom line. This strategy will be continued in the current year.

FUTURE OUTLOOK

The domestic market of Pig Iron is still under the grip of unpredictable recessionary trend. Excessive supply situation in the country, imposition of Anti Dumping Duty on Metallurgical Coke import and raising prices of Metallurgical Coke which are beyond industry's control, have adversely affected the performance of the Pig Iron Industries. While it is so, the entry of few more Blast Furnaces in western belt may lead to increased imbalances in supply-demand scenario. Against this, some signs of Steel Industry consolidating may help the Blast Furnace route based Steel Plants to divert their existing Pig Iron for value addition in steel making, paving way to exclusive Pig Iron Manufacturers, to better their profitability. Another positive development in the current year is the abolition of Anti Dumping Duty on Metallurgical Coke imported from China.
