

In its present form, Syngenta is a young company. But it stems from an industrial tradition going back almost 250 years. We are proud of that heritage and of the many milestones en route to today's leading position worldwide.

Financial Years

* Year ended December 31 ** For 15 Months

Creating value for our customers

Integrate

We are bringing together our world leading Crop Protection portfolio and our broad Seeds platform to develop a fully integrated offer on a global crop basis.

Innovate

We will harness our knowledge of agriculture and our understanding of growers to deliver game-changing technologies which will drive land productivity.

Outperform

Our aim is to gain market share across our combined businesses and to create value for our shareholders by first creating value for our customers.

Contributing to food securities

Scarcity of water, energy and land is expected to define food production in the coming decades. This will increase the existing pressure on farmers, who are working to meet the world's needs for food, fuel and fiber. Demand for food has long exceeded

supply in some regions. Every day, almost 1 billion people go to bed hungry. With the global population expected to reach 9 billion by 2050, this figure could rise if action is not taken.

Integrated solutions for today's farmer

Through our world-class science, leading portfolio of crop solutions and strong presence in all agricultural markets, we are uniquely positioned to help growers

around the world to grow more from less.

Engagement

We aim to create shared value for all our stakeholders through fostering partnerships and open dialogue.

Business ethics

Our code of conduct commits us to maintain high ethical standards in all business practices, and we promote a culture of transparency.

Health, safety and environment

We are committed to the highest safety and environmental standards for the production, handling and disposal of our products, and we support our business partners in adopting comparable standards.

Grow more from less

Syngenta believes that farmers can produce enough to meet the world's needs for food, fuel and fiber and safeguard the only planet we have for future generations – if we take a system-wide approach that links technology, land and people. These three elements build the foundation for a sustainable production system in which technology enables better solutions for farmers to increase productivity and profitability, to increase resource efficiency, and help reach food security.

Addressing growers' needs

Syngenta uses its expertise in plant breeding, crop protection and seed care to deliver solutions designed to bring plant potential to life. Whether they grow corn or rice, vegetables or flowers, farmers around the world trust Syngenta to help them produce healthy, premium crops and minimize the use of precious natural resources.
