14. MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Tatia Global Vennture Limited is an infrastructure and real estate developer, building a reputation of quality, craftsmanship and expertise through its special purpose vehicles. World economy has shown initial indications of recovery after a severe spell of recession. The world economy is expected to grow by 4.2 percent in 2010 and projected to maintain the growth momentum in the next 5 years. However, the consumer confidence in major importing countries like USA and EU has been lagging behind economic growth projections and may take some more time before showing any convincing revival.

Along-with recovery, the textile industry is also facing increase in input prices in sync with the global trends. In addition to appreciating rupee, free export of cotton followed by withdrawal of export incentives on cotton yarn are also causing concerns for the sustained recovery in the textile industry. In our view, there is need for an integrated approach to be adopted for the development of the textile and clothing industry in the country. Such an approach is required to ward off any such situation where the strengths of one segment of the textile industry is being undermined for passing temporary relief to another segment of the industry leading to permanent damage to the complete textile value chain. In our views, if any segment suffers from some systemic disadvantages affecting its global competitiveness, it should be overcome through suitable incentives mechanism without affecting any other segment of the industry.

Robust growth in the economic activity in various sectors of the economy as well as all segments of infrastructure and Real Estate Industry turned in an impressive performance in recent time. International Outsource Phenomenon has given boost to the real estate business especially in southern region of the country due to the enabled infrastructure by the Government.

The company will continue its business strategy of building and creating value for all its stake holders in both its existing and new business.

OPPORTUNITIES, THREATS, RISKS, CONCERNS AND OUTLOOK

- ✍ Burgeoning middle class and higher disposable income creating demand for Malls and Entertainment centers.
- ✍ Inculcating Internationally accepted standards in construction and infrastructure.

The company's business, results of operations and financial condition are affected by number of risks, so the risk management function is of paramount importance and integral to the functioning of the company. The objective of the risk management strategy includes ensuring that critical risks are identified, monitored and managed effectively in order to protect the company's business. The company has formal reporting and control mechanism to ensure timely information availability and facilitate proactive risk management. At the enterprise level de-risking of the company's business risk is sought to be achieved by a policy of undertaking diversified projects in different verticals, geographies and revenue model.
