MANAGEMENT DISCUSSION AND ANALYSIS REPORT**Business Outlook & Overview**

While the outlook for the Indian economy continues to remain positive, the growth trajectory is very uncertain. The volatile financial market and the events in the past year globally have dampened the earlier buoyancy and optimism in the economy. The market has seen interest rates going southward and correspondingly interest of deposits and investments rising to very high levels when compared to rates in the past five to six years for a short period of time and then retreating to lower levels. This was on account of global events and availability of funds getting scarce. As we all know the rate of Inflation going into negative territory for the first time in many decades. Your company going forward will focus on investment in such sectors where the downward risk is minimal and the sector is assured of growth in the long term.
