Our Vision

To achieve enhanced, sustainable, long-term shareowner value in responsible partnership with the environment.

Our mission

- To maximise value from cane through core and downstream operations.
- To pursue efficient solutions through front-line technologies for delivering value.
- To be recognised as the industry proxy for balanced growth.
- To be respected as a credible and dependable partner with its stakeholders - the farmers, customers and employees.
- To remain committed to the highest standards of conduct which includes a respect for the laws of the land, the production of an output of acceptable quality, protection of the environment in which the company operates and fairness in dealings with its stakeholders.

Our Stakeholder philosophy

To provide :

- Our shareowners with a superior long-term return for their investment in the company
- Our farmers with a remunerative price;
- Our consumers with a consistently high quality of output;
- Our employees at all levels with challenging and satisfying work that includes continuing opportunities for personal development, and
- Our society with an exemplary demonstration of social responsibility and citizenship at the corporate level.

Our policy

The objective of Thiru Arooran Sugars is to evolve and consistently maintain a Quality Management System across all departments so as to conform to national and international standards in all its end products.

Our objectives

To identify and improve farming methods to produce quality cane and continuously improve on the same through in-house Research and Development as well as through a continuous interaction with farmers and institutions.

To identify, improve and follow the process of continuous upgradation of the end products.

To improve productivity by adopting preventive maintenance of the plant and machinery.

To improve work methods for increasing efficiency at various levels of operations, thus meeting quality standards and reducing cost.

To develop a long-term relationship with suppliers for ensuring better values and quality in a manner that is mutually satisfactory with no conflict of interest.

To run operations within each parameter of pollution and environmental standards to the satisfaction of all relevant stakeholders.

To create a culture of quality through continuous training and educational programmes for employees at all levels in the organisation.

Corporate theme

The management and preservation of the environment is a prime and challenging responsibility of business today. The expansion of commercial interests has so degraded the living environment that the big question is whether we can at all hand the earth down to succeeding generations in a form which enables them to live and prosper in dignity.

The challenge is therefore to produce, without depleting the natural resources. Without disturbing the ecology and to be able to do it repeatedly. The emphasis is on 'renewable'.

Thiru Arooran prides itself on making an honest effort: on being able to live up to this philosophy. The molasses generated as co-product from the manufacture of sugar is converted into alcohol which, in turn, is used to produce chemicals that would otherwise be manufactured through non-renewable resources. Some of these co-products can also be used as an additive to petrol in motor vehicles, thus enabling the conservation of limited crude resources. The other co-product bagasse, derived from the crushing of sugarcane, is used to generate power, thereby reducing the use of fossil fuels.

The effluent from the production of alcohol is composted with the co-product pressmud from the sugar factory to produce an organic manure which is used by farmers to improve the organic content in the soil. This enables the farmers to return to the soil what they take out of it.

All these activities at Thiru Arooran are truly renewable and can be sustained as long as we continue to grow sugarcane.

Board of Directors

Mr. R V Tyagarajan,

Chairman and Managing Director.

A graduate in Chemical Engineering from the IIT Madras and a Master of Science in Management from the Sloan School of Management at MIT, Cambridge, Massachusetts, USA. Also a Director of Tube Investments of India Ltd., and a Trustee of the Kothari Pioneer Mutual Fund (among others).

Mr. V Karthikeyan,

Director.

Chairman's Overview

During the period under review, the Government of India finally decided to act on the vexatious issue of sugar imports by increasing the Customs Duty from 27.5% to 60%. Besides, the Government also finally accepted the industry's demand for a level playing field and subjected imported sugar to the same levy obligation as imposed on domestic sugar producers and further subjected imported sugar to the same regulations on sale and distribution as applicable to the domestic producers. With these new regulations in place, the import of sugar has stopped since April 2000, providing a much needed boost to market sentiment. Besides, the Government also announced a change in the levy free ratio from 40 : 60 to 30 : 70, as a first step towards eventual decontrol.

Both of these initiatives were certainly in the right direction, though belated, but the industry continued to be plagued by excess stocks due to the huge carry over from the previous season (69 lakh tonnes), as also from the huge increase in production during the season to a record level of 183 lakh tonnes. The huge over hang of stocks resulted in un-remunerative prices in the free sale market as well as severe liquidity problems since banks were unwilling to increase their working capital exposure to the sugar industry, which was perceived as a whole, to be not credit worthy.

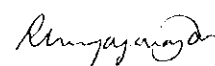

In addition to the depressed conditions in the sugar market, there was also a tremendous glut of molasses and alcohol, especially in the State of Tamil Nadu, as a result of the higher cane crush and this resulted in a steep fall in the realisation on sale of molasses as well as alcohol. The surplus of molasses was so large that exports at depressed prices had to be resorted to so as to clear the storage tanks to receive the next season's production of molasses. The industry has made a strong pitch to the Government to promote an Ethanol Programme for blending alcohol with petrol for transportation as has been in vogue for several years in countries like Brazil, USA, Sweden etc. The Government has already announced a pilot programme in this regard and concerted efforts are under way to expand the scope of this programme so as to ensure sustained off take of Alcohol in the years to come.

In this context of un-remunerative sugar prices, high stock levels and steep fall in molasses and alcohol prices, it is only with great difficulty that your company was able to discharge its liabilities to the farmers as well as to the Banks and

Financial Institutions. On the positive side, the company was able to realize the cane crush projected in the last Annual Report and there was also marked improvement in the recovery, pursuant to the various corrective measures put in place over the last couple of years. Sugarcane yield have shown considerable improvement with the introduction of the new varieties and we are hopeful that the ensuing season will see further improvement in both sugarcane yield and sugar recovery. However, the increasing competition from paddy, as an alternative to sugarcane, sustained by copious availability of water in the Cauvery / Mettur Dam, as well as the ever increasing procurement prices announced by the Government is a matter of serious concern and the company is exploring various alternative to cope with this new scenario.

As regards the outlook for the next year, a lot will depend on the extent to which sugar exports take off, since the industry is expecting another year of bumper production. Though some exports have already taken place on the strength of rising international prices and the weakening rupee, it is too early to make any definite forecast on the likely quantum of exports during the years ahead. Though domestic consumption is increasing at the rate of around 10 lakh tonnes per annum, the industry can breathe easy only if 20-30 lakh tonnes of sugar can be exported out of the country during the coming year. On the policy front, the Government is expected to further liberalise the sugar regime with further reduction in the levy free ratio as well as introduction of futures trading in sugar. While these policy initiatives certainly bode well for the future of the industry, the immediate problems of glut and liquidity constraints need to be addressed before emerging opportunities can be capitalised upon.

The period under review also saw the spinning off of the cogeneration business into a separate subsidiary company, so as to sharpen the focus on each of the separate businesses as well as to enable the raising of capital from investors who are interested in the power business as opposed to the sugar business. This is expected to start a new trend in the structuring of sugar mill cogeneration projects in the country.

R V Tyagarajan

Chairman and Managing Director

Shareholders' information

Date and Venue of Annual General Meeting

Friday, 1st December 2000. Time 10.15A.M. at the Rani Seethai Hall, No. 603 Anna Salai, Chennai - 600 006.

Share Price Movements

The high and low quotations of the company's shares on the National Stock Exchange between April 1999 to June 2000 are as under :

Month	High (Rs)	Low [Rs]
April 1999	55.00	45.00
May	49.00	45.00
June	48.00	45.25
July	52.00	45.75
August	71.90	48.00
September	61.50	52.20
October	62.00	53.50
November	60.50	54.50
December	60.00	48.00
January 2000	55.95	43.25
February	48.60	39.00
March	64.00	36.00
April	73.00	53.00
May	54.25	46.00
June	50.00	48.00
