MANAGEMENT DISCUSSION AND ANALYSIS**MACRO VIEW :**

The Indian economy is on the threshold of becoming a major economy in the world. The focus has shifted to two of the most burgeoning and dynamic markets, viz. China & India. While China has achieved significant lead over others in manufacturing sector, India is ahead in the Service sector. The GDP growth at 8% is bears adequate testimony of the robust state of Indian Economy. If the agriculture sector clocks improved growth rate and the Industry and Service sector sustains its current growth rate, India can emulate China and clock double digit growth rate. Real Estate, Capital Market are all booming and the consumerism is on the rise. Spiralling oil prices and the consequent inflation of course cause scare and trepidation. Infrastructure development is another area where the Government needs to focus upon. Bureaucracy and red tapism also need to be controlled and the lead time for starting an Industry in India should be shrunk. Nothing can then stop India's march towards achieving Global leadership status.

INDUSTRY STRUCTURE AND DEVELOPMENTS :

Animal health care industry is on an increasing growth curve. The growth is triggered by increasing awareness about animal health and increasing pet population. Anthelmintic segment within animal health care is witnessing very healthy growth rate. The Bulk Drug Industry (API) in animal health care business in India is dependent on domestic demand as also exports for its growth. The domestic demand is also on the rise and should complement the ever increasing exports. Animal health care business is in a different league in itself. While the major pharmaceutical companies concentrate on human health care and therapeutic drugs the small companies are unable to leverage emerging opportunities as they are found wanting in internal capabilities.

OPPORTUNITIES & THREATS :

The demand for animal health care products for the year 2006-07 is expected to be in excess of 15 billion US \$. The companies which make substantial investment in enduring technologies, systems & processes, innovation and research would acquire international competitiveness and would have the wherewithal to effectively combat internal as well as external threats. The fact that many a multinationals are sourcing their requirement of animal health care drugs from companies in India augurs well for the industry. The companies have to be engaged in blending their competencies and creating new vistas of opportunities. The international market is ruthless and your company's religious focus on maintaining loftiest standards of quality and steadfastness in following the regulatory norms would steer the company ahead of its competitors. The company's ability to remain WHO compliant would earn unflinching loyalty of its customers and would also enable the company to broad base its customers. The company also has to stringently adhere to all environmental and safety norms.

SEGMENT WISE OR PRODUCT WISE PERFORMANCE :

The company operates in only one segment viz. animal health care segment within the broad category of pharmaceuticals. Hence no information is provided. The mushroom division which operated as a 100% EOU is non-operational for the last several years. The company is now exploring various options to commercially exploit the facilities of mushroom division. .

OUTLOOK :

The outlook of animal health care business is good. The underlying sentiments are positive. With the increasing awareness the domestic business will and so will the export business improve. In view of the good performance repeated year after year a robust platform has been shaped for embarking expansion projects.

TRANSCHEM LIMITED

Adversities faced in the past can now be converted into opportunities. With the expiry of patents a number of products would now assume the status of generic offering scope for company to expand and diversify.

RISKS & CONCERNS :

The rising raw material cost fuelled by increase in prices of crude and oil products is mitigating the benefits of increase in price of finished products. The company has to ruthlessly attack and rationalize costs, enhance efficiency, increase productivity and improve quality to retain its leadership status in the business.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY :

The company has a proper system of internal controls to ensure that all its assets are safeguarded and protected against loss from unauthorized use of disposition. Risk mitigation processes are well defined and structured. All financial records are maintained diligently. Internal processes are adequate and would grow with the organization. These systems are periodically reviewed internally and also by Statutory Auditors. They are modified and upgraded appropriately. The systems are also WHO compliant. Your company's internal control systems and procedure are adequate and commensurate with the size of operations.

DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE :

The financial performance of the company for the year has been reasonable and the pharmaceutical business has registered good growth. The static financial ratios are good and indicative of robust financial health. The dynamic ratios though offer huge scope for improvement and barring unforeseen circumstances should improve in the near future. Sales for the year is Rs. 60.15 crores of which export sales is Rs. 32.12 crores and profit before tax is Rs. 0.72 crores.

MATERIAL DEVELOPMENT IN HUMAN RESOURCES / INDUSTRIAL RELATIONS :

There exists a spirit of bonhomie and camaraderie with workmen and the relationship with them has been absolutely cordial. Company continues its quest to spot and nurture talent and conducts many a development programs for the benefit of its employees. Organizational goals and aspirations of the employees are in sync with each other.

CORPORATE GOVERNANCE REPORT

The detailed report on Corporate Governance as per the format prescribed by SEBI and incorporated in Clause 49 of the Listing Agreement is set out below:

A. MANDATORY REQUIREMENTS :**1. COMPANY'S PHILOSOPHY ON CODE OF GOVERNANCE :**

The Company's Philosophy on Corporate Governance envisages the attainment of the high level of transparency and accountability in the functioning of the Company and assist the top management of the Company in the efficient conduct of its business internally and externally, including its inter-action with employees, shareholders, creditors, consumers and institutional and other lenders and places due emphasis on regulatory compliance.

The Company believes that its systems and actions must be dovetailed for enhancing corporate performance and maximizing shareholders value in the long term.

2. BOARD OF DIRECTORS :**COMPOSITION AND CATEGORY :**

- 1 Promoter, Non-Executive Director
- 3 Executive Directors
- 3 Independent, Non-Executive Directors

Independent Directors are Directors, who apart from receiving sitting fees do not have any other material pecuniary relationship or transactions with the Company.

The composition of the Board of Directors during the financial year and also the number of other Board of Directors or Board Committees of which the director is a member/Chairman are as under:

Sr. No.	Name of Director	Category of Directorship	Number of other Directorships (*)
