The company incurred a net Loss of Rs. 643.83 Lakhs for the year as against a loss of Rs. 1986.06 Lakhs in the previous year. As can be noticed, the management started the exercise to revise books of accounts and has written off certain accounts after following the standard accounting policies of India and in consultation with the auditors. This revision has resulted in increased operational profit as compared to operational loss in the previous year.

Review and results of operations

The unfortunate incidence of fraud in the form of GDRs and subsequent SEBI order has adversely impacted on the company's operations. However, with prudence and commitment, the management continues to keep the technologies moving forward. Monies raised from sale of unused assets are being utilized to continue the said operations.

It is indeed heartening and provides a boost to the morale of the scientists and the management in general on various and important patents received during the recent past, a testimony of the strengths of technologies that your company possesses.

Transgene is currently working on two technology platforms – Oral delivery of proteins and peptides and AAV.

Although Transgene demonstrated excellent glucose reduction following oral delivery of Insulin certain technical issues have been noted and these are being addressed in the oral delivery of Insulin and its analogues.
