Management Discussion and Analysis

Economic Scenario

Economic reforms being pursued by the Indian Government have played a critical role in the performance of the economy in the last decade. The average growth rate in the last six years ended fiscal 1999-00 was about 6.5%, which is higher than the average growth rate of 5.6% achieved in the 1980s.

The overall performance of the industrial sector during fiscal 2000-01 however, was somewhat lower than that in the previous year. Combined with the continued good performance of the service sector, the economy is estimated to grow at 6% in fiscal 2001-02, despite low agricultural growth.

The export markets were buoyant, with exports showing a growth of 19.8% in fiscal 2000-01 compared with the 18% target set by the Government. Inflation rate based on point-to-point variation in the Wholesale Price Index, reduced sharply to 4.9% by the end of fiscal 2000-01 from 6.5% a year ago.

Indian Road Freight Transport Sector

The size of the Indian road freight transport sector is estimated at US\$ 10 Billion in which the majority (close to 80%) is unorganized and extremely fragmented. An estimated composition of the industry is as follows:

75%	Individuals owning 1-5 trucks
10%	Individuals owning 5-20 trucks
10%	Corporate/ Government
5%	Single owner and driver

Poor road infrastructure conditions, bureaucratic delays at state borders and trucks functioning on older technology have resulted in poor productivity and increased transit times. The Government of India's announcement to construct a National express highway network by 2007 is expected to bring about far reaching changes to the road freight sector.

The year 2000-01 was one of the severest for the Indian Road Transport Sector. A 25% diesel hike followed by rapid increases in all input costs – spare parts, lubricants, tyres and tubes coupled with lower freight rates put extreme pressure on the already wafer-thin margins. In the last 2 financial years according to the Indian Road Freight Index (IRFI[®]), an analysis of freight rates on the fifty highest cargo traffic density routes in India, inspite of a 65% increase in diesel prices, freight rates went up by only 11% notwithstanding the increase in all other input costs. The two major commercial vehicle manufacturers recorded negative growths last year signaling an excess capacity in the market.

ANNUAL REPORT 2000-01

Business Strategy

The steady integration of the Indian economy with the global markets has accelerated the need for better Supply Chain Management and Logistics management. Logistics ensures that the right product reaches the right place at the right time and in the right quantity and quality. The outsourcing of Logistics to third party logistics (3 PL) providers helps companies to concentrate on their core competencies of manufacturing, marketing and customer servicing. We believe that the demand for 3PL services will grow aggressively in the near future.

Transport Corporation of India Ltd. (TCI) has been the pioneer in the science of freight movement in the Country and has constantly been introducing new service offerings for better customer satisfaction. Today, TCI is the only Company in the Indian market that can offer an integrated logistics solution with our presence in all modes of transport (road, rail, air, sea), company owned warehousing, computerized systems, on line tracking of cargo and value added services.

The Company's strategy for the future is to establish a strong presence in the integrated logistics sector and to attain higher growths in the road and express cargo businesses. With a focus on global quality standards, customer delight and employee effectiveness, the Company is well positioned to achieve the challenges set forth.

Financial / Operational Performance

TCI is India's largest road transport Company with a nationwide reach of 1000 Company owned offices and distribution network in 95% of districts. The Company's established position in the organized transport industry, its increasing focus on high margin value-added services and ability to maintain profitability despite difficult market conditions have helped to improve the bottom line. The Company owns a fleet of more than 600 trucks including specialized vehicles for movement of industrial gases, automobiles, defence and others. TCI handled more than 5.5 million tonnes of cargo and 4 million consignments last year. The Company became the first road transport organization to get the ISO 9002 for service quality in operations.

TCI has registered a growth of 14.54% (15.31% in previous year) in total income from Rs.4357 million in FY 2000 to Rs.4991 million in FY 2001. The operating income also grew to Rs.271 million in FY 2001 by a healthy 12.82% over FY 2000. This growth was driven by increase in business volumes in both conventional and express cargo businesses. Net margin is maintained on enhanced turnover and achieved growth in PAT by 16%. Division wise results are as follows:
