MANAGEMENT DISCUSSION & ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENTS :

This Indian economy continued to perform in the year under review with industrial expansion and Infrastructure development. Overall GDP growth is estimated at 8% for 2005 – 2006, while inflation has remained at 4.5% level. This market dynamics are in constant flux and global outlook in short term is unpredictable. However, dynamic planning and continues efforts to control costs will ensure our progress in years to come.

Trishakti is mainly engaged in the business of supplying Crane to the Consumers for drilling the Oil and Gas. The company has built its reputation based on decades of achievements in providing the crane services to the Industry at a large. Several large and small Crane service hirer located in India are also giving severe competition to the company's business, who are doing the work at the rock bottom tender price, which leads into downturn of the growth.

The Principal cost components consists of labour charges and maintenance of Crane.

OPPORTUNITIES & THREAT :

With the growing market demands, boom in infrastructure sector, huge export potential for exports, high demands for crane hiring has been there.

The threat perception for the Company includes slowing down the world economy, high input costs specially of the maintenance of the crane and the labour costs, increasing competitions from the new entrants, change on the policy of the Government and lo capacity utilization along with the product obsolescence due to emergence of the new technology of cranes.

The Cost of Crane consists' of Spare Part costs, Fuel Cost & Repair and Maintenance are the three major costs for survival of the industry in the market. The Price of Fuel & Spare Parts are often increased by the suppliers, which adversely affects the company's margins. Therefore the company has been exploring various avenues to lower the costs on this account.

SEGMENTWISE / PRODUCTWISE INFORMATION :

The company operates only in one segment of Hiring Crane for the drilling of the oil from earth. There is no other classification of any segment wise performance as applicable to the Company.

OUTLOOK :

The company perceives better prospects for the future once the cost of Spares Parts, labour and fuel are reduced. The company is also aiming at capacity utilization of 90% which should further reduce the Operation and Maintenance cost.
