## partnering in technology

Technology plays a pivotal role in enhancing customer experience. We, at TI track emerging trends in technologies and adapt them to suit our customers' requirements. The binding effect of advanced technology coupled with the appropriate production practices ensure optimum benefits to our customers.

New doorframe plant coming up at Pune

TI commenced servicing the growing passenger car industry in the mid 90s with a roll formed doorframe plant at Bawal in Haryana. Today, TI has grown with the Indian passenger car industry and has located three more plants adjacent to major car facilities at Chennai, Halol and Pune.

## partnering in growth

Customers have always been our growth stimulators and we take immense pride and satisfaction in partnering them in their growth. In the process of growing together, we have partnered many success stories. We provide customer-centric value additions and services to our partners such as dedicated plants, value-add centres and contemporary retail outlets.

The see-feel-try-buy option

Re-engineered the supply chain to service our channel partners "just in time", releasing valuable space and resources which in-turn resulted in a better buying experience for our customers.

## partnering in profitability

All our endeavours are aimed at improving profitability of our customers, including our channel partners. We, in turn, benefit from it, too. Our profitability is a result of our accountability to bring out the best suitable methodology and application beneficial to our customers, adhering to standards of excellence.

A range of chains, tubular & fine-blanked components

Innovative tube manipulation techniques and leveraging Computer Aided Engineering (CAE) tools have resulted in several value engineering propositions finding commercial acceptance and usage.
