The Company during the year incurred a loss of Rs.2470.91 Lacs. Therefore the directors have decided not to declare any dividend for the year.

### B. REVIEW OF OPERATIONS

The shareholders are aware that the cable industry is passing through a difficult time. The situation in the telecom cable industry is extremely tough due to the slackness in the business of BSNL, MTNL and private sector telecom operators who mainly procure the telecom cables. With the emphasis on wireless technology the overall order position of the telecom cable has drastically been reduced and the size of the business shrank considerably. In the export segment also the competition is very tough. The turnover of the Company during the year was Rs. 7730.17 lacs. The turnover reduced sharply due to non-finalisation of order of BSNL for telecom cables during the year. The power cable segment however has shown improvement. The overall quantum of the business in the power cable segment increased to Rs. 4057.83 lacs vis-à-vis Rs. 3664.61 lacs in the previous year. The figures for the PBDT for the current year are Rs. (1992.26) lacs and the corresponding figures for the previous year are Rs. (989.56) lacs.

#### Sick Industrial Company

In view of erosion of entire net worth, the Company has become a sick Company as per the Provisions of Sick Industrial Companies (Special Provisions) Act 1985. The Company is in the process of compliance in this regard.

### Corporate Debt Restructuring

The Company during the year conducted a major exercise of Corporate Debt Restructuring (CDR). Under CDR restructuring the average cost of the term loan of the Company has been brought down from 12.07% to 8.16% p.a. The average cost of working capital fund has also been brought down from 10.60% to 6.78% p.a. In the restructuring, Company also received the benefit of reduction in the margin money on L/Cs and B/Gs to 5% from 15% and 10% respectively. The commission charges on opening of L/Cs has also been reduced to 1%. Further CDR package also approved the restoration of the withdrawn credit limits of some of the consortium member Banks.

In this CDR package IDBI has reduced its rate of interest from 14% to 9% and 10.5% on its various loans. The Financial Institutions / Banks have funded the over dues and rescheduled the borrowings.

The Company has issued on 23<sup>rd</sup> June, 2004 fully paid up equity shares to the tune of Rs. 360 lacs to IDBI against their funded interest as per CDR package. The number of shares issued were 27,43,902 @ of Rs.13.12/- (i.e. Rs. 10/- face value + Rs. 3.12/- premium) as per SEBI Guidelines.

### De-listing

In accordance with the approval granted by the shareholders in the Extra Ordinary General Meeting of the Company held on 8<sup>th</sup> June, 2004, the Company has made an application for de-listing its shares from Ahmedabad and Calcutta Stock Exchanges. The de-listing from the Exchanges is at advanced stage and the approval is expected to be received in due course.

The Company's equity shares shall continue to remain listed on The Stock Exchange, Mumbai (BSE) which have nationwide trading terminals.

### C. FUTURE OUTLOOK

The Company's future growth will come from the revival of power cable segment and exports. In the power cable segment situation has improved tremendously. The demand for power is expected to increase at a CAGR of 6.3% over the next fifteen years. Based on the projections of demand made in the 16<sup>th</sup> Electric Power Survey additional generation capacity of over 1,00,000 MW need to be added to ensure "Power on Demand By 2012". This amounts to nearly doubling the existing capacity of around 1,00,000 MW in other words, the achievement of more than five decades need to be replicated in the next decade. This will ensure good business for companies in the power cable segment.

In the telecom cable segment however the situation remains volatile. The BSNL/MTNL's fixed network is likely to face increased competition from cellular / WLL services for voice telephony. This will result in erratic demand for telecom cables. Considering these facts the Company is contemplating to undertake remedial measures to the extent feasible for telecom cable segment.

## DIRECTORS' REPORT....(Contd.)

## ANNEXURE TO THE DIRECTORS' REPORT

### FORM A

#### Conservation of Energy

**a. Energy Conservation measures taken :**

- i. On the recommendation of External Energy Auditor the Company installed one more 11 KV transformer to avoid oil losses and to meet peak load.
- ii. Company installed two new APFC (Automatic Power Factor Controller) panels.
- iii. Regular calibration of instruments like temperature controller, air valves and pressure gauges done to avoid wastage of power.
- iv. As per the suggestion of Energy Auditors AC drives were installed instead of normal DOL starters, proper ventilation arrangement in suction lines of all compressors provided to improve compressor efficiency.

**b. Additional investments and proposals, if any, being implemented for reduction of consumption of power :**

No further investments other than above.

**c. Impact of the measures at (a) and (b) above for reduction of energy consumption and subsequent impact on the cost of production of goods :**

- i. The maximum demand of electricity not crossed the limits, resulting in better power factor and less discharging of power capacitor.
- ii. Due to installation of new Capacitor Banks reduction of the load on previous APFC.
- iii. Installation of additional transformer resulted in saving of units / month.
- iv. Reduction in the energy losses due to regular maintenance and calibration of equipments.

**d. Total energy consumption and energy consumption per unit of production as per Form A in respect of industries specified in the schedule thereto :**

Not applicable.

### FORM B

#### Form for disclosure of particulars with respect to absorption, Research and Development (R & D)

## MANAGEMENT DISCUSSION AND ANALYSIS

### Forward-Looking Statements

This report contains forward-looking statements which may be identified by their use of words like "plans," "expects," "will," "anticipates," "believes," "intends," "projects," "estimates" or other words of similar meaning. All statements that address expectations or projections about the future, including, but not limited to, statements about the Company's strategy for growth, product development, market position, expenditures and financial results are forward-looking statements.

Forward-looking statements are based on certain assumptions and expectations of future events. The Company cannot guarantee that these assumptions and expectations are accurate or will be realised. The Company's actual results, performance or achievements, could thus differ materially from those projected in any such forward-looking statements. The Company assumes no responsibility to publicly amend, modify or revise any forward looking statements, on the basis, of any subsequent developments, information or events.

### Overall review

The Company is manufacturing both power & telecom cables. The Company markets its cable under the brand name UNICAB which is a well-known brand in the industry today. During the year the power cable industry has shown signs of resurgence. The situation in the telecom cable industry is still lacklustre. The business in the telecom cable industry suffered due to delay in placement of orders by Bharat Sanchar Nigam Ltd. (BSNL). The Company's turnover also took a beating due to shortfall in the turnover on account of reduction in the telecom cable business. During the year the Company went through the Corporate Debt Restructuring (CDR) exercise which will have a significant impact on Company's working in the years to come.

### Opportunities and Threats

The Indian power sector is currently dominated by State / Central utilities. The installed generation capacity in the country at present is about 1,10,000 MW.

India is a power deficient country with an average energy shortage of about 7 per cent of total energy requirement and peak shortage of 12 per cent of peak capacity requirement.

To bridge this deficit and to cater to future demand, the country needs additional power generation capacity of approx. 1,00,000 MW over the next few years. This is equivalent to the entire existing generation capacity in the country. Apart from capacity, shortage, the power sector in the country is plagued by high transmission and distribution losses, lack of grid discipline, excessive workforce, ageing transmission and distribution systems and lack of commercial orientation. It is against this backdrop that Parliament has recently enacted the Electricity Act 2003, the single most important piece of legislation for the power sector in India. The Act aims at liberalising the power sector, by creating a vibrant and progressive legislative framework to facilitate India's accelerated economic growth.

Some of the key features of the Act, which would radically alter the power sector landscape include liberalisation of the generation

sector, introduction of competition in transmission and distribution through open access, mandatory unbundling of SEBs leading to privatisation, introduction of trading as a separate market function, preparation of national policies on tariff, rural electrification, renewable energy development, strengthening of the roles of regulatory commission, constitution of appellate tribunal and stringent anti-theft measures to curb the incidence of high commercial losses. All these measures will give a boost to power cable sector in the country which will provide good opportunities for business growth in the power cable segment.

The telecom cable sector continues to witness tough times. The capacity utilisation rates across companies are at low and uneconomical levels. The surplus capacity relative to demand, has led to lower realisations, making the business operations for telecom cable [both Jelly Filled Telecom Cable (JFTC) and Optical Fibre Cable (OFC)] companies unviable. This has taken its toll on revenues and profits of companies.

However there is expected to be some improvement in the OFC demand. The demand for OFC will also come from broadband service operators like BSNL and private companies who will start focusing on increasing networks to customers for their services in large cities and towns, where fibre will be taken up to the buildings. The demand for JFTC is largely dependent on orders from Bharat Sanchar Nigam Ltd. (BSNL). We estimate that demand from this segment to slide, as network rollouts will be undertaken using the CDMA based Wireless in Local Loop (WLL) technology.

### Segment wise performance

The Company mainly operates in two segments i.e. Power and Telecom cables.

The segment wise performance of the Company have been mentioned in the part (C) Point no 5 of Notes to the Accounts as per schedule 'P'.

### Outlook

The demand for power cable is likely to be strong as the Electricity Act, 2003 will radically alter the power sector landscape. It will liberalise the generation sector, introduce the competition in transmission and distribution through open access, the mandatory unbundling of SEBs leading to privatisation, introduction of trading as a separate market function, preparation of national policies on tariff, rural electrification, renewable energy development, strengthening of the roles of regulatory commissions, constitution of appellate tribunal and stringent anti-theft measures to curb the incidence of high commercial losses will improve the demand for cables as well as other ancillary power equipments.

In the telecom cable segment the demand will have to come from the thrust on improving the teledensity in the rural segment and to a small extent from the replacement demand. The exports of JFTC foam skin cables which are used in other countries will also give opportunities for exports.

In the OFC segment demand from major public sector companies viz. GAIL, ONGC, Railtel, PGCIL, NTPC and the Roads Authority will continue to some extent. In the oil, gas, transportation and power segment the demand is expected to

UNICAB  
**UNIFLEX CABLES LTD.**  
 14TH ANNUAL REPORT 2003-2004

## MANAGEMENT DISCUSSION AND ANALYSIS....(Contd.)

continue as the companies will deploy their OFC networks to improve their communications and signalling systems and in the case of oil companies, to track oil leakages. With the policy on conditional access system expected in 2004-05, OFC demand for metro access is also expected to materialise.

### Risks and Concerns

The telecom cable segment continues to worry the cable manufacturers. The capacity utilisation rates across companies are at low uneconomical levels. The demand for JFTC is largely dependent on the orders from BSNL. It is expected that the demand from this segment is going to slide as network rollouts will be undertaking using the CDMA based Wireless in Local Loop (WLL) technology.

There are risks to the demand for Optical Fibre Cables (OFC) also as BSNL is still the single largest consumer of OFC in India. While access network deployment is expected to start from 2004-05, there could be delays if operators decide to postpone its deployment. Another trend that could emerge will be the increased leasing of excess bandwidth, thereby reducing the demand for backbone OFC, which is still not taking place in any big way.

The other area of concern is that the 80% of Company's investment is in telecom cable segment. In case the pressure on revenues as well as profits continue the Company will have to take some tough decisions in the future with regard to telecom cable plants.

### Internal Control Systems and their Adequacy

Uniflex has a proper and adequate system of internal controls to ensure that all assets are safeguarded and protected against loss from unauthorised use or disposition and that transactions are authorised, recorded and reported correctly.

The internal control systems are supplemented by an extensive programme of internal audits, reviews by management and documented policies, guidelines and procedures. The internal control systems are designed to ensure that the financial and other records are reliable, for preparing financial statements and other data and for maintaining accountability of assets.

Uniflex has strong and independent internal audit systems, covering on a continuous basis, the entire gamut of operations and services spanning all locations, businesses and functions.

Internal audit at Uniflex includes evaluation of all financial and operating system controls.

Internal audit findings and recommendations are reviewed by the top management and the Audit Committee of the Board.

### Financial Performance with respect to Operational Performance
