However, the Company could not take advantage of this opportunity due to working capital constraints.

3. FINANCE

On acceptance of the Company's proposal, the Company will be benefited by the proposed scheme when accepted through reduction in the interest cost, as well as rescheduling of repayments of debts. Management Discussion and Analysis Report

a. Industry Structure and Developments

Unimers India Ltd is the only manufacturer of EPDM in India. The technology has been received from the world renowned Uniroyal Chemical Co. (now a Crompton Corpn. unit). The EPDM grades (Trade name 'Herelene') manufactured by UNIMERS INDIA LIMITED are suitable for a wide range of applications.

b. Opportunities and Threats

The Company had traditionally commanded a major share of the domestic market. Continued dumping by EPDM manufacturers located in US, EU, Brazil and china, as well as major disruptions in availability of one of the primary raw materials (propylene), resulted in low capacity utilisation in 2004-05. However, the stabilisation of raw material supply, as well as good growth in the automotive industry augur well for the future prospects of the Company.

c. Risks and Concerns

Hardening of prices for refinery products like Ethylene, Propylene and Furnace Oil would influence EPDM production cost. The high debt portfolio is another cause for concern.

d. Internal Control Systems and their adequacy

The Management has ensured that necessary internal control systems are created and maintained in all departments. These internal control procedures are adequate and commensurate with the size of the Company and nature of its business. The statutory and internal audits carried out by professional and reputed external agencies have not highlighted any major discrepancies, omissions and the like.

e. Financial and Operational Performance

The Company's operational efficiencies have remained the same compared to previous year in spite of lower capacity utilisation due to better operation and management. However increase in raw material cost and lower utilisation of capacity affected profitability.

As regards sales of EPDM, although the sales volume were lower than the previous year, there was an increase in realisation in the latter period of 2004-05, due to global increase in demand as well as tightness in supply consequent upon global capacities shortfall.

f. Outlook

The outlook for the near term future appears to be bright for the Company. Demand is rising in India as well as in the rest of Asia (notably China), Europe and USA. With demand growth likely to be higher than supply, this is expected to impact favourably on the Company's sales volumes and realisation.

g. Material Developments in Human Resources / Industrial Relations fronts including number of people.

Employee relations continue to be cordial. Training and Development activities are identified, organised and progress monitored as part of Human Resource Development activities. The total manpower strength has been optimised at 126 personnel.
