MANAGEMENT DISCUSSION AND ANALYSIS

The impact of both domestic and international factors ensured the continued downtrend in the Indian Economy during the year under review. Various reports are projecting a sub 5% GDP growth, one of the lowest in the past decade. Though there are indications of the economy turning the bend, the results are not visible yet. This scenario was further compounded by Regulatory issues in the Education Sector, directly impacting our line of business. The impact was over the entire higher education system, it was felt more in the Distance Education sector, our mainstay.

The key ratios for the financial year are as follows:

Particulars	Year ended 31.3.2014	Year ended 31.3.2013
Profitability Ratio:	%	%
EBITDA/ Net Sales	-3	10
PBT/ Sales	-10	4
PAT/ Sales	-10	3

Industry Overview :

[Sources: Extract from 12TH Five Year Plan, www.researchandmarkets.com, www.ibef.org, www.business-standard.com; Company internal research; etc.]

Skill development is critical for achieving faster, sustainable and inclusive growth on the one hand and for providing decent employment opportunities to the growing young population on the other. The demographic window of opportunity available to India would make India the skill capital of world. India would be in position to meet the requirement of technically trained manpower not only for its growing economy but also of the aging advanced economies of the world. Boston Consultancy Group's study in 2007 had clearly indicated that by 2020 while India will have surplus of 56 million working people, the rest of the world will encounter a shortage of 47 million working people.

India Ratings, a Fitch Group Company, expects the Indian education sector's market size to increase to Rs 602,410 crore (\$109.84 billion) by FY15 due to the expected strong demand for quality education. Indian education sector's market size in FY12 is estimated to be Rs 341,180 crore. The sector grew at a compounded annual growth rate(CAGR) of 16.5% during FY05-FY12. The higher education (HE) segment was at 34.04% (\$17.02billion) of the total size in FY10 and grew by a CAGR of 18.13% during FY04-FY10. India Ratings said that it has a stable outlook on the Indian education sector which includes both school and higher education. Despite a high demand for education within India, India Ratings has concerns of the sector. In 2012, the sector faced liquidity issues due to a fall in enrolment growth and delays in HE students' fee reimbursements by a few state governments.

"Some segments in the education sector face enrolment slowdown due to macro-economic factors, lack of industry appeal and employability issues. Management institutes with less or no industry association witness low enrolment and revenues leading to loan defaults or closures. India Ratings does not expect enrolments for these entities to rebound in the short term," said the report.

In India, Private professional institutes are expanding with a strong growth rate which has opened the doors for foreign universities. Also there is an opportunity in the test preparation market in India, though institutes are expanding with a continuous growth rate but still there is high potential of growth. The Gross Enrolment Ratio (GER) in higher education in India (per cent of relevant age group enrolled in higher education) is estimated at 11%. In comparison, enrolment's levels are 60% in the US and 16% in China. The data shows that the sector is in a stage of early growth and there is an ample scope to explore for quality players.

Company Outlook & Strategy

The prevailing Economic Scenario and the transitional phase of the Education Sector, has forced us to critically evaluate our long term business strategy.

The uncertainty in the Distance Education sector and other Regulatory issues plaguing the Higher Education segment are affecting our business and also impacting quality of delivery, which is core to our values.

Considering the current scenario, your company is looking at new ventures both within India and outside, to increase shareholder value. A new initiative is being taken to formulate and provide Maths tutorials & Data Science training for the UK market in association with local partner/service provider. The pilot is in progress at this point and delivery is planned to start within the next financial year i.e 2014-15.

At the same time your company also plans to increasingly support the establishment of the Usha Martin University, Jharkhand, which is now a reality.

Our shareholders will be pleased to note that the State Government of Jharkhand vide its Notification dated 16th July, 2013, accorded sanction for the establishment of Usha Martin University, Jharkhand with effect from the date of publication of the Notification in the Gazette, i.e. 18th July, 2013.

Business Review

Learning Business Segment

The Company is continuing its major focus in the undergraduate segment. During the current year under review, your company has successfully trained and provided placement assistance to over 50% of the students enrolled in its various study centres.

The wholly owned subsidiary of the Company, namely Usha Martin Education Private Limited ("UMEPL") has changed its business model to licensing and consultancy and sold off its school management business 'as a going concern' to Usha Breco Education Infrastructure Limited, a Company formed for the sole purpose of School Management Solutions. The sale was done on consideration as the Board of Directors' of UMEPL deemed appropriate on the basis of independent valuation undertaken by a firm of Chartered Accountants.

However, UMEPL is continuing to own its' Usha Martin School Brands and earning license fees by licensing the said brands to various Usha Martin Schools.

Opportunities and threats

India sits at the forefront of the new economic paradigm. It is poised to develop into one of the top 5 economies of the world in the next 2 decades. One of the main reasons behind the Indian economic growth emerges from its demographic profile. The emerging demographic dynamics of the country ensures that it will have one of the youngest populations in the world.

There is opportunities in development of institutes; content, curriculum and pedagogy support; training of trainers to improve the quality of training-delivery; setting up world-class training institutes; certification, accreditation and testing.

However, success is anything but guaranteed. The global recessionary situation, if sustained can reduce the employment opportunity. Another major aspect of higher education is the issue of 'employability'. This shortfall in qualified workforce is further exacerbated when the "employability" lens is applied, which measures whether the educated personnel would have the right skills to be employed.

Further there are normal risk factors of the Governmental policies which pose a deterrent to entry of private players in education business.

Adequacy of Internal Controls

As a trend, the Company continues having an internal control system that is proper and adequate for the size and nature of business of the Company for maintaining accounting cost control and efficiency in operation. The Company ensures that the documented procedures and various methods, developed internally from time to time, are being followed meticulously and are very much effective. The gist of the procedures is as follows:-

- Proper Delegation of power to de-centralise the whole operation for making it more dynamic.
- Preparation of annual budget for targets for business growth which is continuously monitored throughout the year.
- Financial control & approval based on budget allocation.

The Company also has adequate system to ensure that all of its assets are safeguarded and protected against loss from unauthorized use or disposition, and transactions are authorized, recorded, and reported correctly. The internal control system is supplemented by internal audits, review by management, documented policies and procedures.

Human Resources

Human Resource continues to play the key role in the growth and development of your Organization. Given the current outlook and future business strategy, it has inducted experienced senior level as well as middle level management professionals, useful for this sector. The Company, as usual, has maintained cordial relation amongst the employees.

The Board of Directors expresses its deep appreciation for sincere efforts made by the employees of your Company at all levels for the development of its business during the year and their co-operation in maintaining cordial relations.
