21st Annual Report 2011-2012

DIRECTORS' REPORT AND MANAGEMENT DISCUSSION & ANALYSIS

Your Directors have pleasure in presenting the Twenty First Annual Report together with Audited Accounts of the Company for the year ended on 31st March 2012.

BUSINESS PHILOSOPHY

Your Company and its management has always been cautious of its brand and corporate image apart from its corporate social responsibility. Even within the limitation of having limited resources and infrastructure available at its disposal, the management of the Company has worked out a product basket and is consistently improving upon the same, so as to ensure that the products of the Company command its respect in terms of quality, service and acceptability apart from giving maximum return on investment thereby multiplying the investors fund. After sanction of the revival scheme from the Hon'ble BIFR, the Company has been consistently making its efforts to re-establish its brand and product in the market and with the emphasis on the quality and service, the Company shall be in a position to re-establish itself very shortly. The Company has always endeavoured to provide innovative products with quality and the said approach of the management of your Company stands more strengthened.

OUTLOOK

Although the financial Year 2011-2012 has been difficult and challenging for your Company because of various factors including amongst others, financial constraints, sickness of the Company during the immediate past, discontinuation of its products and presence in the users market and complete re-organization of the organizational structure. The same was also a challenging year as the Company was to ensure that on the one hand, it does not incur any loss despite of the acute shortage of working capital fund whereas on the other hand, it had to re-introduce itself in the market with new energy and strength. Your Company has made all its efforts to optimally utilize all the resources available at its disposal and achieve the maximum targeted result. The circumstances prevailing with the Company during the previous years have almost continued with little improvement. However, your Directors are working constantly towards a better future which has started showing the favourable results as well as is evident from the improved financials of the Company and acceptance of its products in the market. Having experienced the stiff competition in the market for electronic products, the Company has been very cautiously selecting its product basket with the objective to achieve improved optimum rotation of available finances and to ensure optimum profitability. With the more widely acceptable products having increased demand, your Directors are confident that with the infrastructure available with the Company and brand influence in the market having enjoyed for more than two decades, the Company shall revive its operations and re-gain the glory of its brand at the earliest. The Company is also making all its efforts to enter into manufacturing and trading of further innovative products having demand in the market and has accordingly, entered into products such as CCTV Cameras, Digital Video Recorders (DVR) as well and its accessories etc.

Your Company's performance during the year as compared to the last year is as under:

DIRECTORS' REPORT AND MANAGEMENT DISCUSSION & ANALYSIS Contd.

The Company commenced implementation of the Sanctioned Revival Scheme from July 2009. However, due to the acute shortage of working capital fund, the performance of the Company was under constraint. Despite of all the constraints, the Company and its Directors have made all attempts and efforts to optimally utilize all the resources available at their disposal and the net worth of the Company has shown remarkable improvement resulting into reduction of accumulated losses. Your management is pleased to note that the revenue of the Company has been more than doubled whereas the net profit has also been almost double as compared to the last year.

Your management is confident that during the current year, the working capital fund requirement of the Company shall also be slowly met by arranging fresh funds for which the Directors of the Company are making all their efforts and with the strength of its products, quality, marketing and other infrastructure facilities, the Company is confident that it will once again move forward. With this commitment to the investors, work force and society at large, the management reassures you that your directors are putting all their efforts to arrange the working capital, which may take some time in view of the past history of the Company. But, they are confident about the potential of the Company and express their gratitude for the confidence reposed by the investors and all other stake holders.

DIVIDEND

Considering the results of the Company and in view of the accumulated losses together with the huge requirement of working capital, the Board has not recommended dividend on shares.

INDUSTRY STRUCTURE AND DEVELOPMENT

Even though, IDC forecasts a substantial growth in India in PC / Laptop market but due to severe competition and erosion in selling prices, there has been no growth in value and profitability terms. With the introduction of low range Laptops in the market, even a sizeable segment of computer users have been shifting their choice to Laptops instead of Personal Computers. Considering the changing trend and product demand, the Company has entered into manufacturing and trading of other electronic products, having abundant demand in the contemporary market apart from being innovative and less competitive. The management is continuously keeping a vigilant approach as regards the fast changes taking place in the market with respect to demands of various electronic products in the industry and is all determined to adapt to the changing demand considering its infrastructure.

OUTLOOK ON THREATS, RISKS AND CONCERNS

The Company has an integrated approach to managing the risks inherent in various aspects of its business. As a part of this approach, the Board of Directors is responsible for monitoring risk levels on various parameters, and the Board of Directors supported by professionals in various fields is responsible for ensuring implementation of mitigation measures, if required. The Audit Committee provides the overall direction on the risk management policies.

The over all economic environment will have a strong bearing on how things shape in the coming years. Falling prices of the electronic products due to increasing competitiveness with the introduction of multiple variants in each product are potential risks. The over all Industrial and Business sentiment has been low during the last financial year. Your Company, therefore has planned to introduce high quality technically advanced gadgets in the Company's product basket once it meets the working capital requirement to start its operations in full capacity, which will expedite its revival scheme. Your Company, however, is confident that with the launch of high quality, competitively priced products, it will be able to expand its market share. With the objective to achieve maximum return on investment with quality of products and services, your Company has ventured into Security and Surveillance related electronic products and its accessories and your Directors have pleasure in informing you that the products of the Company are gaining appreciation in the market indicating a vast potential.

SEGMENT WISE PERFORMANCE

The Company has been operating in the electronic industry and dealing and manufacturing only electronic products including Security & Surveillance related electronic equipments. The Company's products are mainly electronic and therefore there is a single segment of operation. In view of the same, segment wise reporting is not required.
