MANAGEMENT DISCUSSION & ANALYSIS

MACRO ECONOMIC ENVIRONMENT

The year 2012 had been a year of slow growth world over and as per IMF forecast Global Economy is likely to show a growth of 3.3% during 2013 as compared to growth of 3.2% during 2012. The Global Economies witnessed a subdued growth with diverging growth paths across major economies. US economy which has registered a modest recovery is again subject to the adverse impact of the budget sequestration which will gradually gain pace during 2013. Japan's economy has shown signs of improvement on account of monetary and fiscal stimulus undertaken. The sovereign debt crises and the danger of a banking system meltdown in peripheral euro zone countries coupled with contraction in its major economies like Germany has resulted in negative growth in Euro zone.

The growth in the Emerging Market Economies which are viewed as growth engines of the world economy world over; have also slowed down with Brazil and South Africa registering accelerated growth where as Russia, China and India recorded a lower growth.

According to the Central Statistics Office's advance estimate of GDP growth, Indian Economy is expected to grow at 5% during the year 2012-13 as compared to a growth of 6.21% registered during 2011-12. This has been mainly on account of weak industrial activity compounded by domestic supply bottlenecks and slackening of external demand. This has also slowdown the growth in the service sector which has been the main driver of the growth.

The Reserve Bank of India in order to strike a balance in growth- inflation dynamics have initiated various measures during 2012-2013 to provide greater liquidity to financial system. This has resulted in moderating the headline inflation within its acceptable level. The food inflation as measured by new combined (rural and urban) consumer price index (CPI) remains in double digit is a cause of concern. The measures initiated are expected to result in moderate growth in GDP in the second half of 2013-2014.

REVIEW OF OPERATIONS

During the Financial Year 2012-2013, the Company registered a gross income of ` 19.58 Lac as compared to ` 7.33 Lac in previous financial year. PBT Margin during the year remains ` 1.06 Lac in comparison to last years' figure of ` 3.12 Lac whereas Net Profit remains at ` 0.71 Lac in comparison to last years' figure of ` 2.18 Lac.

BUSINESS SEGMENT

The Company was in no business during the year under review apart from some broking activities of Buy/Sale of Land & Buildings and thus unable to comment exactly on the topic.

OPPORTUNITIES & THREATS

The Fundamental drives of India's medium term growth prospects remain intact. However, global developments, in conjunction with Indian Policy responses to the concerns noted above, are likely to make 2012-2013 a challenging year.

Global economic and financial conditions can be expected to remain adverse for some time, particularly in the aftermath of Japan's natural disaster. Once the current financial year and commodity volatility subsides, deeper structural factors are likely to slow down economic
