Due to the Bank OTS and No liability of the unsecured Loan the interest burden on the company would become nil & consequently the cost of production would also reduce which would directly result into the company selling its product at a competitive rate, and its profit margin would increases.

Since there would be no monthly installment payable to the Bank and No creditors old balance is pending the Cash Flow of the company would increases which would consequently add to the net worth of the company.

The change of the Government Policy where by the production of 50 microns bags is mandatory instead of 20 microns. It is pertinent & important to note that higher production of 50 microns is easier in the machinery. Due to change in the Govt. policy, the company can achieve higher production of the 50 microns at lower cost which would directly result in more sale and consequent higher profit and cash flow.
