INDUSTRY AND ECONOMIC SCENARIO:

India is the third largest steel producer in the world after China and Japan. In the year 2016, India produced higher finished steel. Driven by rising infrastructure development and growing demand for automobiles, steel consumption is expected to grow in future. The Government of India has allowed 100 percent Foreign Direct Investment (FDI) in the steel sector under automatic route. Due to adverse Global conditions, there has been a large inflow of imports. This has also manifested in a series of price cuts for the domestic steel industry during the year, leading to a squeeze on margins earned by steel producers.

India's prospects are brightening due to low oil prices, the reform momentum and policies to increase infrastructure manufacturing output. India's steel demand is likely to increase in the years to come. Going forward, implementation of policy measures already announced, structural reforms and government investment in infrastructure will be critical to India's economy.
