ANNEXURE 'A' FORMING PART OF DIRECTORS REPORT

Information in accordance with the provisions of section 217(1)(e) of the Companies Act, 1956, read with the Companies (Disclosure of Particulars in the Report of Board of Directors) Rules, 1988 and forming part of the directors report.

A. Conservation of energy:-

a) Energy conservation measures taken:

The Company is making all around efforts for the conservation of energy. Following are the key areas where steps have been taken and substantial energy savings have been obtained:

Previously, we were running the coal fired boiler having capacity of 18MT. It was generating the steam in excess of the quantity actually required hence there was no proper utilization of steam and increasing the cost as well as fuel consumption. It was decided to run the 10MT boiler instead of 18MT. As a result 40-45 % coal consumption was reduced.

In addition, the company reduced the load of power supply by using the machines periodically by the technique of departmental rotation. This has reduced the energy consumption and bills substantially as decided by the management in last Annual General Meeting.

Steps are being taken to save the compressed air, by reorganizing the supply lines, and starting the smaller capacity compressors for the Dye House.

The impact of the above measures will be felt during the current year.
