2. MANAGEMENT DISCUSSION AND ANALYSIS REPORT:**A) BUSINESS REVIEW:****Global Perspective**

Globally, the Steel industry is witnessing revolutionary changes due to fierce competitive pressures on performance, productivity, price reduction and customer satisfaction. Trade in steel products of different grades and speciality has been on an upswing with the increase in production facilities coupled with technological innovations in both the developed and developing countries.

However, sagging prices in the backdrop of economic slowdown have spelt turmoil in the steel industry, the world over. The future is uncertain, but challenging and holds great promise if the right steps are taken because of the inherent qualities of steel.

Indian Outlook

India is among the top producers of all forms of steel in the world and is one of the fastest growing markets for steel. The Indian steel industry comprises of the producers of

finished steel, semi-finished steel, stainless steel and pig iron.

The total demand for steel in FY 2011-12 grew to 65.2 MT against 46.8 MT in FY 07. The demand expanded at a CAGR of 8.6 per cent over a period from FY 07-11. The future growth of Indian Steel industry will largely depend upon the Government measures of injecting funds in various industries such as construction, infrastructure, automobile and power to boost economic growth.

Company's Business Strategy

The Company has started the implementation of its Rolling Mill upgradation project with an investment of around ₹ 130 Crores. Almost all the equipments have been ordered and it is expected to be completed by March-April 2013. With this project, the Company will be able to increase production, improve quality, reduce costs and improve customer satisfaction by reducing changeover time as well as adding to the product range. To part finance this project, the Company has raised an External Commercial Borrowing (ECB) of USD 16.66 million. The Management has decided to leave this amount unhedged for the time being. The cost of ECB even after taking into account the depreciation of the rupee will be lower than a rupee term loan as long as the USD remains lower than ₹ 70 at the time of repayment of ECB.

The renewed focus on product development continues, along with increased efforts on training and HR practices. The Company follows a LVCQSA strategy - Low Volume Critical Quality Special Application which gives it an advantage of less competition from mass players and increased loyalty from customers seeking stringent quality.

Company's Future Outlook:

As the Country is witnessing the slow down in growth, the automobile industry has slowed down. This is having a serious impact on business sentiments for alloy steels also. As a result, this year the volume will be under stress as also margins. In addition, there will be plant shutdowns which has to be taken for the Project. This will have an impact even on margins. The Company hopes to recover its performance from the year 2013-14 onwards.

D) MANAGEMENT PERCEPTION OF RISK AND CONCERN:

As stated earlier, the Company is going through an expansion phase by upgrading the Rolling Mill. This is going to happen at the existing site. The biggest risk the Company sees is that there could be larger than planned disruptions in the project which could hamper current operations. Also, the current slowdown could get much worse which may further affect volume. The rupee may continue its steep fall adding to the Company's costs as lot of scrap is being imported. Also, this would increase the cost of ECB.

To mitigate the above risks, the Company has appointed M/s Realization as Project Consultants who are one of the top consultants in the world in implementation of Project by using Critical Chain method propounded by Dr. Eliyahu M. Goldratt of 'Goal' fame. The Company has found their inputs quite useful while implementing the Rolling Mill Project.

The Statutory Auditors of the Company have submitted Auditors' Report on the accounts of the Company for the accounting year ended 31st March, 2012. In their report, they have made an observation regarding non-compliance of Accounting Standard - 11 so far as re-instatement of liability in respect of ECB is concerned (Refer Note 25 to Financial Statements).

The Company had raised ECB of US\$ 16.66 million in December, 2011 and drawdown of the same happened at conversion rate of ₹ 52.48 per US\$. As on 31st December, 2011, the liability in respect of the said ECB was reinstated as the rupee had depreciated to a level of ₹ 53.10 per US\$ on that date.

However, as on 31st March, 2012, while following the conservative approach, the Company did not provide for notional foreign exchange gains amounting to ₹ 3.70 Crores arising because of appreciation of rupee and decided to carry the liability in respect of ECB at a level determined as on 31st December, 2011. The other points of Auditors' Report are self explanatory and needs no comments.
