2. MANAGEMENT DISCUSSION AND ANALYSIS REPORT:

A) BUSINESS REVIEW:

World Steel Position

In the year 2013-14, the world steel demand grew higher than predicted due to stronger than expected performance in the developed countries in the second half of the year. The recovery in US gained strength and downturn in Europe bottomed out resulting in improvement in steel prices in the later half of the year.

As many emerging economies continue to struggle with structural issues and financial markets volatility coupled with Chinese government's policy to restrain investment activities in order to rebalance its economy, the Global Steel production is expected to increase by only 3.4 percent in 2014-15 as compared to 3.5 percent growth in 2013-14. However, gradual improvement in capacity utilization, expected slowdown in exports by Chinese government and further softening of raw material prices may brighten up the overall steel industry in the coming year. The expected turnaround in construction sector will also provide a much needed boost to steel industry. In respect of automotive steel, various projects by many renowned companies will become operational in South Asian countries like Thailand, Indonesia and China resulting in higher demand of automotive steel from countries like India and Korea. Turkey, Vietnam, Indonesia and Malaysia are fast becoming promising markets for auto components in coming years.

Indian Scenario:

In 2013-14, the Indian economic slowdown has resulted in depressed demand for steel from end user industries. Construction, auto and capital goods sector continue to underperform. The auto sector with the exception of two wheeler segment has recorded a decline in sales volume. During the year, India produced 21.4 million vehicles against 20.6 million vehicles in year 2012-13. Though the demand for utility vehicles is growing but the demand for Medium and heavy commercial vehicle is down by 21%.

However, the demand for steel in India is still subdued and it is expected to start rising in the 2nd half of 2014-15 due to expected boost by government in infrastructure sector and lifting of ban on iron ore and coal mines in Goa. This will promote use of steel in commercial vehicles as well as in railways.

Export of steel sheets, coils and billets will be high due to anticipated Rupee depreciation. The Society of Indian automobile manufacturers has predicted a growth of about 6% in auto segment in India.

With India becoming a hub for exporting passenger cars being manufactured by companies like Hyundai, Nissan, Suzuki, Toyota, Honda etc. who are looking to replace imported steel for critical parts by procuring the same from within India, the demand for value added products like bright bar, Spheroidized annealed steel and normalized steel is anticipated to be higher in the coming years.

Company's Business Strategy & Future Perspective:

The Year 2013-14 was a difficult year for your Company with slowdown in automobile industry along with internal turbulences faced by the Company during the implementation of new Rolling Mill. This led to serious impact on sales volume of the Company and led to depressed margins. This situation, however, has started improving but the demand of steel is likely to increase from second half of the Financial Year 2014-15.

During the year, your Company has successfully upgraded its capacities by implementing new State of Art Rolling Mill from renowned maker of Rolling Mills - M/s. Morgardshammar, Sweden. This new Rolling Mill which has become fully operational from 1st January, 2014 is expected to significantly improve capacities and efficiencies. The project got delayed by 6 months due to certain supply problems from the manufacturer which led to increased operating costs at our end. However, now the plant is running efficiently and at full capacity.

Your Company continues to focus on high quality niche products and is expanding in this area with the expansion of Bright Bar & Spheroidized Annealed Steel capacity being undertaken by the Company which will increase the capacity of Bright Bar Shop from 1,500 MTs to 2,100 MTs per month and Annealed Steel from 600 MT to 900 MT per month. This Project is likely to be completed by the end of Financial Year 2014-15.

Further, as mentioned in the last Annual Report, we had applied to the Environment Ministry for permission to enhance the melting capacity to 2,00,000 tonnes. This permission has not been received and we have been asked to make certain investment in Secondary Emission Control System. We are reasonably confident that once we install this equipment, we will get the permission. After that, we will have to make some investments in the Steel Melting Shop to increase the capacity. Total investment is envisaged to be around ₹ 25 crores. Detailed working has yet to be done, and time frame envisaged for completion is December, 2015.

On the exports front, the Company exported 4,102 MTs of alloy steel in 2013-14 as against 4,207 MTs in year 2012-13. In the coming year, the Company will target newer export destinations in addition to consolidating and increasing sales in present countries. New approvals are in sight from other global companies which shall add to export volumes for the Company.

Your Company continues to remain focussed on its most important resource - The Human Resource. The Company aims to improve quality of work life with a check on absenteeism and attrition rate of employees.

C). INTERNAL CONTROL SYSTEM:

The Company has well defined internal control system. The Company takes abundant care to design, review and monitor the working of internal control system. Internal Audit in the organization is an independent appraisal activity and it measures the efficiency, adequacy and effectiveness of other controls in the organization. All significant issues are brought to the attention of the Audit Committee of the Board.

D) MANAGEMENT PERCEPTION OF RISK AND CONCERN:

Though there are strong grounds for expecting a brighter future for steel industry but this optimism needs to be tempered

by an awareness of the continued challenges like potential volatility in terms of raw material prices or abrupt decline in steel prices in the event of regional or even global political, economic or natural disruptions that could stifle growth in this industry. Continuous increase in energy and labour cost and depreciation in value of rupee, as lot of scrap is imported, are other concern areas. This year will continue to be tough but we can see light at the end of the tunnel and we foresee things to start turning around may be in the last quarter of this Financial Year.

To counter these situations, your Company shall focus on operational excellence and efficiencies. Efforts in these areas will be valuable regardless of cyclicity and competitive nature of the industry and will be key to taking advantage of today's opportunities while preparing for an uncertain future.

Change in Policy

In one area, we have changed our policy. Earlier, we were booking the losses on account of fluctuation in exchange rates against our liability of External Commercial Borrowing. Whereas in the event of any gain on this account, the same has not been taken into account. But to bring the policy at par with the laid down accounting practices, we are now re-instating the liability on this account according to the exchange rate prevailing at the end of each quarter.

E) HUMAN RESOURCES /INDUSTRIAL RELATIONS:

The Company continues to lay emphasis on building and sustaining an excellent organizational climate based on human performance. Performance management is the key word for the Company. During the year, the Company employed over 800 employees.

Pursuit of proactive policies for industrial relations has resulted in a peaceful and harmonious situation on the shop floors of the plant.
