

A resilient portfolio through the cycle

Vedanta Resources plc Annual Report FY2016

Vedanta Resources plc is a UK listed global diversified natural resources company.

Our core purpose

Vedanta is a globally diversified natural resources company with low-cost operations. We empower our people to drive excellence and innovation to create value for our stakeholders. We demonstrate worldclass standards of governance, safety, sustainability and social responsibility.

3: Engineers at Jharsuguda smelter.

A resilient portfolio through the cycle

We have experienced volatile markets and significantly lower commodity prices during the financial year and the entire organisation has met these challenges well.

Highlights

Vedanta demonstrated resilience this year: delivering healthy EBITDA margins, strong free cash flow and lower gross and net debt in a volatile commodities market. In India, we achieved record production in aluminium, zinc, lead, silver and copper cathodes, with significant increases in power generation. We made good progress on the turnaround of our Copper business in Zambia and broke ground at the Gamsberg zinc deposit in South Africa. With our combination of low-cost and wellinvested assets, we look forward to the future with cautious optimism.

Anil Agarwal, Chairman

Group highlights

Financial highlights

- Revenue of US\$10.7 billion and EBITDA¹ of US\$2.3 billion, lower than FY2015 primarily due to lower commodity prices (FY2015 Revenue: US\$12.9 billion, FY2015 EBITDA: US\$3.7 billion)
- Adjusted EBITDA margin² of 28% (FY2015: 38%), driven by low commodity prices
- Free cash flow³ of US\$1.7 billion, up 63% (FY2015: US\$1.0 billion), driven by optimisation of operational, capital expenditure and working capital initiatives
- Net debt reduced by US\$1.1 billion and gross debt reduced by US\$0.4 billion during the year
- Underlying (loss) per share⁴ of (131.9) US cents (FY2015: (14.2) US cents)
- Basic loss per share of (665.8) US cents primarily due to a non-cash impairment of US\$3.3 billion (net of tax) and lower EBITDA, reflecting lower commodity prices
- Covenant modifications on bank loans at Vedanta Resources plc secured until the period ending 30 September 2018 and complied with as on 31 March 2016
- S&P downgraded issuer credit rating from 'BB' to 'B' and Moody's downgraded its corporate family rating from 'Bal' to 'B2' due to weak commodity prices
 - S&P subsequently revised the outlook to 'Stable' in April 2016
- Hindustan Zinc Limited announced its highest ever special dividend in Q4 (c. US\$1.8 billion including dividend distribution tax)
- Final dividend of 30 US cents per share

Business highlights

- Simplification of the Group structure continues to be a priority
- Record production of zinc, lead and silver at Zinc India; aluminium, power and copper cathodes at Copper India
- Commenced ramp-up of capacities at Aluminium, Power and Iron Ore divisions
- Entire Power portfolio of 9,000MW now operational
- Successful implementation of Mangala Enhanced Oil Recovery Programme at Cairn India
- Recommenced production at Goa Iron Ore operations, achieved exit run rate production of 0.8 million tonnes per month
- Continued ramp-up of production at the Konkola mines at Copper Zambia
- Strong cost performance, with lower cost of production across all businesses; cost savings of c.US\$325 million delivered in the year

Aluminium

Commenced ramp-up of capacity at the 1.25mt Jharsuguda Aluminium smelter.

See page 80

Power

Entire Power portfolio of 9,000MW operational.

Iron Ore

Recommenced production at Goa Iron Ore operations.

Oil & Gas

Successful implementation of Mangala Enhanced Oil Recovery Programme at Cairn India.

Consolidated Group results

(US\$ millions, except as stated)

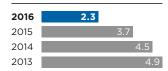

(+		
	FY2016	FY2015
Revenue	10,737.9	12,878.7
EBITDA ¹	2,336.4	3,741.2
EBITDA ¹ margin (%)	21.8%	29.1%
EBITDA margin excluding custom smelting ² (%)	27.6%	38.0%
Operating profit before special items	881.2	1,735.5
Loss attributable to equity holders	(1,837.4)	(1,798.6)
Underlying attributable loss⁴	(364.1)	(38.9)
Basic loss per share (US cents)	(665.8)	(654.5)
Loss per share on underlying profit (US cents)	(131.9)	(14.2)
ROCE (excluding project capital work in progress,		
exploratory assets and impairment charges) (%)	6.2%	8.7%
Total dividend (US cents per share)	30.0	63.0

- Earnings before interest, taxation, depreciation, amortisation, impairment and other special items. Excludes custom smelting revenue and EBITDA at Copper and Zinc India operations as custom smelting has different business economics. Free cash flow is cash flow arising from EBITDA after net interest, taxation, sustaining and capital expansion expenditure, movements in capital creditors and working capital movements. It is reconciled to EBITDA on page 52 in the Finance Review. Based on profit for the period after adding back special items and other gains and losses, and their resultant tax and non-controlling interest effects.

Production recommenced in Goa in August 2015. Based on fourth quarter of FY2016 cost.

A resilient portfolio through the cycle

Disciplined

During this period of weak commodity prices, Vedanta has maintained a disciplined approach to capital allocation, prioritising high-return, lowrisk projects to maximise cash flows. The Group's well-invested assets are on track to deliver near-term growth with marginal incremental capital expenditure. We retain the option to fund further growth projects such as EOR and gas projects at Oil & Gas business, Lanjigarh Alumina refinery expansion and the additional 400kt copper smelter at Copper India.

In FY2016 capex was optimised to reduced levels of US\$0.6 billion, with most of this invested in highreturn projects such as expansion at Zinc India, the Mangala EOR programme at Oil & Gas and smaller amounts to complete the Aluminium and Power projects.

Capital investment in Gamsberg, one of the largest zinc deposits in the world, was rephased and only US\$16 million was invested in FY2016. We have also made significant progress in reducing Gamsberg capex over the life of the project, reducing capex by US\$200 million primarily through re-engineering and renegotiation of contracts, taking advantage of the current commodity environment. The project comprises a 250ktpa mine, propelling Southern Africa into a leading supplier of zinc globally. First ground was broken in July 2015, with initial production expected in early 2018.

US\$0.6bn Total capital expenditure

- 2: Control room of BALCO power plant.3: Engineer at the control room at BALCO.
- **4:** Coal handling plant at Jharsuguda. **5:** Employees at the control room at Lanjigarh.

Efficient

923kt
Record production of Aluminium

A relentless focus on operational efficiency has driven down the cost of production (CoP) across our businesses, mitigating the impact of falling commodity prices throughout the year.

Record full-year aluminium production reflected the impact of the Jharsuguda-II and Korba-II smelters ramping up well, delivering a record aluminium production of 923kt and a reduction in CoP of 10% for the year. The Lanjigarh Alumina refinery also achieved a strong production of 971kt during the year.

Good progress on the mine expansion in Rampura Agucha and the Sindesar Khurd mine and continued higher volumes from the Rampura Agucha open pit resulted in record zinc production, alongside higher volumes of integrated lead and silver at the Sindesar Khurd mine. We are one of the top 20 silver producers in the world at our current volumes.

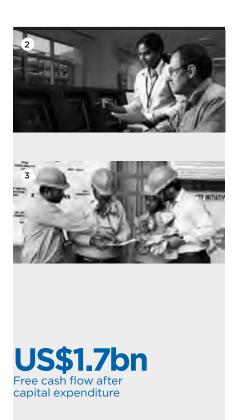

The turnaround plan for KCM in Zambia is starting to bear fruit. Cost reduction initiatives are now yielding results, driving down the cost of production, and with a focus on safe production build up, volumes are now rising. Production of mined metal at Konkola Deeps is up by 23% compared with last year due to improved efficiency, equipment availability and better copper grades.

See page 56

A resilient portfolio through the cycle

Focused

In line with the Group's long-term strategic priority to de-lever and increase cash flow, Vedanta continued to make good progress against these objectives. The focus on optimising operating and capital expenditure and working capital management contributed to strong free cash flow of US\$1.7 billion (after capital expenditure), during FY2016. This enabled a reduction of US\$1.1 billion in net debt, as compared to March 2015.

An ambitious target to deliver cost and marketing savings of US\$1.3 billion was set and these initiatives across the business delivered US\$325 million in FY2016, through over 900 initiatives across the businesses, including consolidation of spend and reduction of vendors, contract renegotiation and efficient logistic solutions.

Several operations have been restructured to protect free cash flow. These include the temporary shutdown of the BALCO rolled product facility, the temporary shutdown of one line at the Lanjigarh Alumina refinery that drove down aluminium costs, and closure of the Nchanga underground operations at Copper Zambia.
