BUSINESS OUTLOOK AND MANAGEMENT DISCUSSION:

SARK Systems India Limited

Your directors are pleased to share with you that your company has completed twelve years.

E-Governance and Common Service Centers:

The company has established citizen service centers (known as common service centers) in rural India in Bihar and Haryana. While the company won support price in Bihar, the centers in Haryana were setup with no support price as at that point of time rural market boom was greatly envisaged. The various G2C services enunciated by the governments in the request for proposal are taking more time to launch and hence the gestation of the project to generate significant revenues also is extended.

After the global financial meltdown, again the finance industry is looking up and more products and services are entering into the rural market in a big way. Accordingly your company is soliciting tie-up with various insurance and financial services players and banks to play a significant role in financial inclusion.

The company is exploring tie-up with various portal based education service providers and skill imparting industry to launch the same in rural markets.

The company is bidding for National Population Register (NPR) in some of the states where it has presence/well established operations. National Population register is an exercise being done by registrar general of India as part of census process. RGI is intending collection biometrics information and digitizing the citizen information as per UID guidelines. This initiative provides a great opportunity for your company in the states it is present to get good volume of work. In the year 2010-11 and 2011-2012 these projects are expected to mature and give good results to your company.

Portals for Rural Market:

The company is hosting rural product marketing portal www.vabhee.in to launch intra village trading services. The portal is expected to give new dimension and broad base the business of SARK to rural retailing and merchandising.

It is also felt that the business of SARK has to be broad based than limiting only to e-Governance which is resulting stunted growth because of revenue dependence from only one sector – e governance and there by cash flow uncertainties leading to working capital problems. These issues accumulate to an extent that the growth of the organization also is getting stifled. It is expected that alternate cash flow generation will help in mitigating these risks.

Debtors Management:

The collections management from Government sector continued to be a strenuous exercise that is impacting the growth of the company also. Hence conscious decision is made to broad base the operations to reduce this single customer base-Government sector.
