

Our values

Creativity

Our commitment to technology and quality is the basis for our competitive advantage: our creativity is what allows us to develop innovative solutions that generate value through performance enhancements and continuous improvements.

Cooperation

Encouraging internal and external cooperation is an effective tool which enables us to create unique solutions with our partners.

Each Vesuvius employee is committed to the success of its community of colleagues and customers.

Reliability

Our solutions involve us in critical aspects of our customers' manufacturing processes.

Our commitment to consistently deliver quality products and services gives them the level of confidence they require.

Integrity

At the heart of our promise lies the trustworthiness of all Vesuvius employees in their acts and words. Integrity, honesty and transparency are essential in all our relationships.

Embracing diversity

Vesuvius is a global company built upon a true respect for local customs and experience. We recognize and embrace the potential for creativity that comes from the coexistence of so many different cultures.

	28,223	24,199
Basic & Diluted Earnings Per Share	Rs 27.48	Rs 27.21

Operating & Financial Performance, Internal Control

It continued to be a difficult period for the Indian economy reflected by lower GDP, inflationary trends and lower industrial production. The steel industry, which comprises the biggest group of the Company's customers, also faced a similar difficult period. Poor availability of iron ore and other raw materials resulted in reduced production and major expansion projects have been delayed. These have had a negative impact on our business.

This year total revenue increased by over Rs 2,058 lakhs driven by domestic growth in spite of the slowdown in domestic steel production while exports had marginally reduced.

Increase in raw material prices, energy & transportation and adverse foreign exchange fluctuation have placed a burden on the margins for the year. Margin decline was most severe at the beginning of the year. Focussed action on cost, internal efficiencies and price optimisation helped restore profitability by year end.

The Kolkata plant expansion was completed in April 2012 and the plant is ready to cater to the proposed increased demand of customers. Freehold land at Visakhapatnam has been purchased and possession obtained for setting up the fifth plant of the Company. An international standard Research & Development Centre is also proposed at this location.

The Company always engages with customers to enable them to be aware of the systems and processes internally followed by the Company. In one such interaction, Mr A P Choudhry, Chairman and Managing Director of Rashtriya Ispat Nigam Limited visited their Blast Furnace -III at Visakhapatnam and interacted with the Vesuvius team working at that site. He was delighted with the processes being followed and appreciated that all team members strictly adhered to the Health and Safety norms.

The LD3 CSP caster-1 at Tata Steel was commissioned successfully in February 2012. Vesuvius provided the entire tundish refractory and application for this caster. The entire refractory job for the new 1.2 million tons per annum pellet ("MTPA") plant of BMM Ispat which was commissioned during the year was provided by the Company. Similar turnkey refractory supply and installation was done at Essar Steel's 6 MTPA iron ore pelletisation furnace in Paradip. The largest boiler gunning repair work was done for JSW Energy at Barmer during the year.

All four factories had been working at near full efficiency during the year. In-plant rejection for all manufactured items have been further reduced due

to improved processes. Safety measures and processes have been installed at all plants and work sites.

The Company has in place an established internal control system designed to ensure proper recording of financial and operational information and compliance of various internal controls and other regulatory and statutory compliances. Internal Audit has been conducted on a pan India basis.

The Company has complied with the provision of the Code on Internal Control which require that the Directors review the effectiveness of internal controls including financial, operational and compliance control and risk management systems. Self certification exercises are also conducted by which senior management certify effectiveness of the internal control system for which they are responsible together with the Company's policies.

Dividend

The Board of Directors are pleased to recommend dividend of Rs 4.50 per share i.e. 45% on Equity Shares of Rs 10/- each. The dividend together with dividend tax will entail a cash outflow of Rs 1,061 lakhs (previous year Rs 1,000 lakhs). If this is approved at the forthcoming Annual General Meeting, dividend will be deposited with the bank within April 30, 2013 and dividend warrants will be despatched on or after May 3, 2013 to those who are members of the Company as on April 25, 2013. In respect of shares held electronically, dividend will be paid on the basis of beneficial ownership as per details furnished by the depositories.

ISO Certification

The Company's factories at Kolkata, Mehsana and Visakhapatnam and two of its sites at Surat in Gujarat and Dolvi in Maharashtra have been certified ISO 9001:2008 for Quality Management Systems Standards.

Mr. A. P. Choudhry, CMD of RINL with Vesuvius Team

Report of The Directors (Contd.)

Segmentwise performance

The Company is primarily a manufacturer and trader of refractory and is managed organizationally as a single unit. Accordingly, the Company is a single business segment company. Geographical (secondary) segment has been identified as domestic sales and exports.

Industry Structure & Developments, Opportunities & Threats, Outlook, Risks & Concerns

It continues to be a difficult period for the Indian economy. GDP has become lower at around 5% while inflation remains high. Foreign exchange fluctuation have also added to the concerns and estimates had to be revised. The steel industry, which is the major customer of the Company, which have been impacted with shortage of iron ore and other raw material have reduced volumes and have delayed their expansion plans.

Competition activities have increased causing pressure on margins. International refractory companies are now strategically entering Indian and South Asian markets.

Other industries like Aluminium, Cement, Power etc where the Company also operates, have also been facing similar slow down due to reduced demand.

Your Company trades in refractory based solutions and steel industry comprises the biggest group of its customers. Hence anything that affects the steel industry will have its one off effect on our business. India is set to emerge as the second largest producer and consumer of steel in the next few years and refractory being an essential requirement in steel industry will see increased demand. The Kolkata plant expansion was completed in April 2012 and is ready to meet any increased demands of the customer.

All business operations have risks and threats attached to them most of which may be outside the control of the Company. Apart from the concerns over raw material prices and availability, fluctuations in exchange rates, inflationary pressures, adverse political or regulatory developments, aggressive competition and chances of a reduction in customer output leading to lower demands are some perceived threats.

During the year a risk analysis and assessment was conducted in line with the Group requirements and no major risks were noticed.

Directors

Dr S K Gupta and Mr Yves M.C.M.G. Nokerman retire by rotation in accordance with the Articles of Association of the Company at the forthcoming Annual
