CHAIRMAN'S STATEMENT

Dear Members,

It is my pleasure to welcome you all to this 94th Annual General Meeting of the Company.

During the year, due to continued demand recession, financial stringency with the customers, projects in our conventional product sectors such as Sugar and Cement moved very sluggishly and some of them were even put on indefinite hold by our Customers. This coupled with inability of some of the Customers of ongoing projects to arrange funds and release timely payments adversely affected the turnover and the bottom line of the Company. In the present conditions no immediate improvement in respect of such projects is expected. Therefore, special thrust is being given to booking orders for, Exports; Cogeneration & Bio-mass Power Plants and material handling projects for which opportunities available are relatively better. The Company has also entered into a strategic understanding with an International Defence and Aero Space Company to bid for execution on turnkey basis of certain Defence Projects for the Ordnance Factories under Ministry of Defence, in keeping with the decision of the Government of India for opening up this sector to the Private Industry. However, on account of sensitive nature of these projects, the decision on prequalification and thereafter selection of the final successful bidder is likely to take some time.

The Company has taken steps towards revamping the Organisation structure and systems, slimming down to the extent possible, eliminating avoidable expenses, controlling costs and effective contract and project management, for improving the performance.

With your continued support and with the devotion and determination of the operating team, we are optimistic in tiding over the current situation.

The turnover achieved during the year was Rs. 179.51 Crores as compared to Rs. 228.84 Crores in the previous year.

The shortfall in sales, was mainly due to inability of our customers to arrange timely finances. Also on account of demand recession in some of our conventional product segments such as Sugar & Cement, the expected orders planned for execution during the year did not materialise.

The bottom line was affected, both by shortfall in turnover and lower margins due to continuous decline in the prices of Machinery for Sugar, Cement and Gears as a result of dearth of orders.

As informed in the last year's Directors' Report – on closing down the overseas hospitality and Infotech business, the Company had sought permission of Reserve Bank of India (RBI) for dis-investment. RBI has since given the permission for dis-investment and accordingly the necessary formalities for the same has been completed during the current year.

2. CURRENT YEAR

The order book at the beginning of the current year is at Rs. 267 Crores, but out of these orders worth Rs. 54 Crores are either non-moving or slow-moving due to funds constraints with the customers. Fresh investments in Sugar & Cement industries have become scarce due to their glut in the Country. We are, however, giving special thrust on booking Export orders for these segments. The order book position is reasonably satisfactory for steam generating plants and EPC projects for Biomass power generation plants, but the turnover will depend upon arrangement of finance by customers.

For improving competitiveness, continued efforts are being made by reducing costs, improving productivity and making procurement more economical.

3. EXPORTS :

The foreign exchange earning for the year was Rs. 111 Lakhs as against Rs.890 Lakhs in the previous year. Efforts are being made for increasing the export business by exploring all possible opportunities for Sugar & Cement Machinery.

4. DIVIDEND :

Your Directors are pleased to recommend Dividend for the financial year 2001-2002 on Equity Shares of Rs.10/- each at Rs.2.50 per share equivalent to 25% (33% in the previous year) aggregating to Rs.75.11 lakhs.

5. MANAGEMENT DISCUSSION & ANALYSIS :

5.1 Overview :

The year ended 30th September, 2002 was challenging for the entire engineering industry engaged in manufacture of Capital Goods. The demand for sugar & cement machinery in indigenous market is continuously declining due to saturation in capacity. This coupled with financial stringency faced by the customers, had impact on our turnover and bottom line.

The Company has taken steps towards revamping the organisation structure and systems, sliming down to the extent of possible, eliminating wasteful expenses, controlling costs and effective contract and project management.

5.2 Segment Analysis and Review :

5.2.1 Heavy Engineering Product Segment :

This segment is engaged in manufacturing and supply of machinery required for sugar plants, cement plants, steam generating plants, EPC projects in power generation, heavy duty gear boxes, Special Products in fabrication of equipment's for atomic energy, space & defense and General Engineering Products for petrochemical, fertilizers and steel plants.

This segment has achieved the turnover of Rs.16346 lakhs accounting for 91 percent of Company's revenue. Except for sugar & cement machinery for which the business out look is not encouraging in indigenous market, Company does not perceive major threats in the other products under heavy engineering.

Outlook :

To overcome the situation of low demand for Sugar & Cement machinery, the Company is trying for technical tie-up for entering into manufacturing of ethanol plant as a diversification plan and concentrating on booking export orders. The Company is optimistic about future business opportunities in Steam Generating Plants, EPC projects in Bio-mass Power Generation, Equipment's for Special Products, Nuclear Power, Energy, Space, Defense and General Engineering and Heavy Duty Gear Boxes. While consolidating its competitive position in its existing areas of business, the Company is preparing its plans to avail new opportunities.

5.2.2 Foundry & Machine Shop :

This unit is engaged in manufacturing of C.I. Castings, SGI Castings, Castings required for automobile industry and machining of components for Nuclear Power & Space Programme.

This segment has achieved revenue of Rs.1495 lakhs accounting for 8 percent of the Company's revenue.

Indigenous demand for automobile castings has been fluctuating and the order book position is not satisfactory. However, the demand for SGI castings and export is promising.

Outlook :

Eventhough the results of the year 2001-2002 were not satisfactory, efforts are being made for improving performance, by special thrust in marketing including export and cutting down costs.

5.3 Other Non-Reportable Segment :

These include a unit at Dharwad for manufacturing pressure and temperature guages; an infotech services division and hospitality business.

The income from these segments was Rs.223 lakhs accounting for 1 percent of the Company's revenue.

Outlook :

i) Tiwac Division at Dharwad:

The business of pressure / temperature guages is picking up and profitable.

ii) Hospitality Business :

As regards hospitality business, it was confined to providing expert services and know-how, during the year 2001-2002.

It is now proposed to enter directly in hospitality business by running Restaurants, Banqueting halls/party rooms and cafes, considering the business potential for fast food in the country.

iii) Infotech Services Division :

This division has been restructured based on the current I.T. business scenario and it is hoped that its performance will improve with the global recovery in I.T. business.

5.4 Internal Control Systems :

The Company has introduced adequate risk management and control system, commensurate with the scale and nature of its operations.

Broadly these internal control procedures ensure the following :

- i) Efficient, effective use and protection of Company's resources.
- ii) Compliance with stipulated policies, procedures, statutes, accounting records and adequacy of internal control system and procedures.
- iii) In respect of the working capital and cash flow management, the Company has been able to contain cost of working capital inspite of the prevailing liquidity crunch. However, further efforts towards reducing debtors and liquidating non-moving inventory are being continuously undertaken to improve the cash flows.

These control systems are periodically reviewed and updated on an ongoing basis. The Company is having in-house Internal Audit Department for reviewing the internal control systems regularly.

5.5 Human Resources :

Human Resources are the most valuable asset of this Company which is engaged in high tech design and manufacturing of heavy engineering equipments. Then continuous development, training and the recognising as well as rewarding talent has been an ongoing exercise within the Company. Emphasis on goal setting and team working are encouraged. The culture of accountability and responsibility has been incorporated for performance optimisation. For effective project execution and satisfied customer, 'own the project' concept is being developed.

6. FINANCE & ACCOUNTS :

6.1. Fixed Deposits :

There are no fixed deposits outstanding with the Company.

6.2 Income Tax Assessments :
