MANAGEMENT DISCUSSION AND ANALYSIS REPORT**
INDUSTRY STRUCTURE AND DEVELOPMENT

The primary business of the Company is investing and lending funds. With the overall improvement of the economy, the Capital Market also showed good recovery during the year under review. Both agriculture and industrial sector showed very good turn around. The Government had taken steps to give an impetus to the economy and it is understood that the surroundings in which your Company operates would change for the better.

The Industry has good opportunities for investments. As mentioned in the previous year the market for financial companies did not improve at the desired rate because they were unable to compete with the commercial banks which provided funds at a cheaper rate.

OPPORTUNITIES AND THREATS, RISKS AND CONCERNS

A large amount has been utilised by the Company in its investment and lending activities, which are the Company's principal business. The Company is a part of the Williamson Magor Group possessing good business infrastructure. Improvement in general business activities in the country would provide better opportunities to the Company to improve its income level by better utilisation of its properties and infrastructure. With the improvement in performance of the Companies to which it has lent or invested funds the Company is expected to do better with higher rate of recoveries and higher income by way of dividend and sale of shares in the days to come.

In view of the liberalisation of the financial sector the Indian capital market is to a great extent linked with the major capital markets of the world. On account of such inter-connection, despite the uptrends in the Indian economy, the Indian Stock Markets are seen to behave in line with the global trend which sometimes is inconsistent with the Indian economy. Rising interest rates all over the world and a steady increase in the rate of inflation is a cause of concern for finance companies.

To mitigate the various types of risks that the Company has to face the Board of Directors of the Company has recently adopted a Risk Management Policy which is under implementation.

FINANCIAL PERFORMANCE

The operational performance of the Company during the year under review was satisfactory. Taking full advantage of the bullish Stock Market the Company could earn a sizeable income by disposing of some of its investments at the opportune time. The Company also recovered a large amount which was earlier provided for as NPA and the same has improved the bottomline significantly.

OUTLOOK

With the steady improvement in the economy the Indian capital market has grown consistently during last few years offering ample opportunities to the financial companies to perform better under the prevailing conditions. With the improvement in performance of the Companies in which your Company has invested funds, barring unforeseen circumstances, your Company is expected to do well in the current year as well.

INTERNAL CONTROL SYSTEM

The Company maintains a system of internal control commensurate with its size. The Internal Auditors regularly conduct review of the operations. The Audit Committee reviews the adequacy of internal control system at regular intervals and provides guidance for improvement. The Risk Management Policy adopted by the Company is expected to further strengthen the Internal Control System.

CAUTIONARY STATEMENT

Statement in the Management Discussion & Analysis Report in regard to projections, estimates and expectations has been made in good faith. Several unforeseen factors may come into play and affect the actual results, which could be different from what the Directors envisage in terms of future performance and outlook. Market information contained in this Report have been based on information gathered from various published and unpublished reports, and their accuracy, reliability and completeness cannot be assured.
