III. OTHER INFORMATION:

1) Reasons of loss or inadequate profits:

The Clothing business continues to be one of the most challenging business to sustain due to short product life cycle, volatile fashions, unpredictable market trends and impulse purchase nature of the consumer. The pandemic apart from being a major restraint on the clothing industry has also led to the drastic decline in clothing consumption, patchy demand, supply chain disruptions, cancellation of orders and cut down in discretionary spending by consumers. This has severely impacted the profitability of the clothing industry including our business as the company caters to the mid-premium to premium segments in both the domestic and export markets.

Further the lower than expected turnover of the company's branded business due to the distress in the independent retailer segment caused by unprecedented disruption of markets, competitors offering goods regularly on sale or return basis, with virtually payable-when-able terms and selling goods on discount at their ex-factory prices, and funding discounts or freebies to the end consumers etc. has also affected the company's performance adversely. The company has however been steadfast in its policy of no discounting/freebies, as well as on its terms of business, especially timely payment and strict no returns policy.

Apart from lower turnover, fear of COVID, higher depreciation and substantially higher store rentals, new stores under gestation/extended gestation and Forex loss, reduction of duty drawback etc has also been a major contributor to the loss incurred by the company during the FY 2021-22.

2) Steps taken or proposed to be taken for improvement:

With the expected growth of the Indian economy post the pandemic on the back of sustained consumer demand and the increasing disposable income of a large population base, the clothing consumption in India is expected to grow steadily. The company expects to take full advantage of the same.

With India having signed FTA's with UAE and Australia and expected to finalise the FTA with the UK by this November, the company expects substantial growth in its exports.

With the company continuing its strong focus on delivery of KPI's like increase footfalls/conversion rates /sharpened inventory control to ensure consumer satisfaction, the company expects to return to profitability soon.

The Company is also geared to scale up its operations to meet the demands of the offline and online retail of its existing and new customers, which will improve the company's profitability in the year ahead.

The Company has already implemented various strategies to increase the Company's turnover despite the market conditions, both in the Branded and International business, by tapping new markets and segments and expects the results to fructify in the near future. The Company has also initiated process to identify and close down under-performing stores on a regular basis. Further the Company is also making all out efforts to generate other streams of income.

3) Expected increase in productivity and profits in measurable terms:

Taking into account the current volatile economic scenario and sharp Inflationary pressures, potential restrictions/lockdowns due to omicron and other variants and the anticipated GST hike on clothing, the ongoing Russia- Ukraine war it would not be prudent to project the expected increase in productivity and profits for the year ahead at this stage.

However the Company being a well established brand name with clear focus in the mid- premium to premium segment in the domestic markets through its branded business, strong design focus in exports business and established overseas customer base and adequate financial flexibility amid low gearing, strategic investments in Private Equity (PE) funds that are expected to yield healthy returns, conservative approach towards growth with strong focus on quality and brand is expected to result in better profitability in the near future.
